inductive reasoning is everyday intuitive reasoning it contrasts with deductive or logical reasoning inductive reasoning is much more prevalent than deductive reasoning yet there has been much less research on inductive reasoning using contributions from the leading researchers in the field the interdisciplinary approach of this book is relevant to those interested in psychology including cognitive and developmental psychology decision making philosophy computer science and education

decisions we make how to figure things out inductive reasoning versus deductive reasoning is a most unusual book where the reader is taught how to figure things out using a step by step process developed by one of the nation's leading behavioral scientist and best selling author dr treat preston this book addresses such issues as the decisions we make deadly decisions inductive reasoning deductive reasoning reasoning skills argumentation and debate argumentation critical thinking in action it leaves no stone unturned in its effort to teach its readers the value of being able to figure things out and developing a habit of proper decision making here is the table of contents disclaimer and terms of use agreement introduction there are two sides to every argument chapter 1 laying a proper foundation chapter 2 inductive reasoning chapter 3 deductive reasoning chapter 4 intellectual versus emotional decisions chapter 5 why we must decide chapter 6 summing it all up i have a special gift for my readers meet the author the topic of figuring things out is not a subject taught in schools and it should be learning at a young age the art of reasoning and thinking is an essential tool to take from childhood into adulthood decision making should be based on facts and not emotion once all of the facts are garnered a person is free to decide on what side of an argument they actually believe and reside but the decision should be based on fact and not emotion

suppositions made for the sake of the argument sometimes conflict with our beliefs and when they do some beliefs are rejected and others retained thanks to such hypothetical belief contravention adding content to a supposition can undermine conclusions reached without it subversion can also arise because suppositional reasoning is ampliative these two types of nonmonotonicity are the focus of this book

the implications for philosophy and cognitive science of developments in statistical learning theory in reliable reasoning gilbert harman and sanjeev kulkarni a philosopher and an engineer argue that philosophy and cognitive science can benefit from statistical learning theory slt the theory that lies behind recent advances in machine learning the philosophical problem of induction for example is in part about the reliability of inductive reasoning where the reliability of a method is measured by its statistically expected percentage of errors a central topic in slt after discussing philosophical attempts to evade the problem of induction harman and kulkarni provide an admirably clear account of the basic framework of slt and its implications for inductive reasoning they explain the vapnik chervonenkis vc dimension of a set of hypotheses and distinguish two kinds of inductive reasoning the authors discuss various topics in machine learning including nearest neighbor methods neural networks and support vector machines finally they describe transductive reasoning and suggest possible new models of human reasoning suggested by developments in slt
