this book provides a comprehensive overview of the taxonomy biology sedimentation and carbonate
geochemistry of modern species students early career and advanced scientists alike will profit from a
broad synthesis of the current understanding of planktic foraminifers as an ecological indicator
biogeochemical factories and proxies in paleoceanography the classification of modern species is amply
illustrated with electron and light microscope images of morphotypes addresses the state of the art of
molecular genetics of species and provides a detailed guide for any laboratory analyses the biology of
planktic foraminifers is extensively discussed in chapters dedicated to the cellular ultrastructure

nutrition symbionts reproduction ontogeny and test architecture building on the biological prerequisites the distribution of planktic foraminifers is discussed at regional to global scale the geochemistry and sedimentation of tests are considered in relation to the ecology of the living animal in the final chapter which examines the most common methods in planktic foraminifer research hands on information is provided on sampling processing and analyzing samples in the laboratory as well as selected established methods for data interpretation the various topics discussed in this book are aimed at the application of planktic foraminifers as sensitive indicators of the changing climate and marine environment

evidence based validation of herbal medicines translational research on botanicals brings together current thinking and practice in the characterization and validation of natural products the book describes different approaches and techniques for evaluating the quality safety and efficacy of herbal medicine particularly methods to assess their activity and understand compounds responsible and their probable underlying mechanisms of action this book brings together the views expertise and experiences of scientific experts in the field of medicinal plant research hence it will be useful for researcher who want to know more about the natural lead with their validation and also useful to exploit traditional medicines includes state of the art methods for detecting isolating and performing structure elucidation by degradation and spectroscopic techniques highlights the trends in validation and value addition of herbal medicine with different scientific approaches used in therapeutics contains several all new chapters on topics such as traditional medicine inspired drug development to treat emerging viral diseases medicinal plants in antimicrobial resistance tlc bio profiling botanicals as medicinal foods bioprospecting and bioassay guided isolation of medicinal plants immunomodulators from medicinal plants and more

reservoir formation damage third edition provides the latest information on the economic problems that can occur during various phases of oil and gas recovery from subsurface reservoirs including production drilling hydraulic fracturing and workover operations the text helps readers better understand the processes causing formation damage and the factors that can lead to reduced flow efficiency in near wellbore formation during the various phases of oil and gas production the third edition in the series provides the most all encompassing volume to date adding new material on conformance and water control

hydraulic fracturing special procedures for unconventional reservoirs field applications design and cost assessment for damage control measures and strategies understand relevant formation damage processes by laboratory and field testing develop theories and mathematical expressions for description of the fundamental mechanisms and processes predict and simulate the consequences and scenarios of the various types of formation damage processes encountered in petroleum reservoirs develop methodologies and optimal strategies for formation damage control and remediation
