this part of sae j968 specifies the flow measuring system including the fixture to be

used for flow testing the single hole orifice plates used in an orifice plate type nozzle and holder assembly described in sae j968 1 which is intended for testing and setting diesel fuel injection pumps on test benches the flow measuring system and fixture ensure accurate flow testing of the entire range of orifices from 0.4 to 0.8 mm diameter as specified in sae j968 1 it is intended primarily for use by the manufacturers of single hole orifice plates

the familiar yellow technical instruction series from bosch have long proved one of their most popular instructional aids they provide a clear and concise overview of the theory of operation component design model variations and technical terminology for the entire bosch product line and give a solid foundation for better diagnostics and servicing clearly written and illustrated with photos diagrams and charts these books are equally at home in the vocational classroom apprentices toolkit or enthusiasts fireside chair if you own a car especially a european one you have bosch components and systems covers injection pump designs governor designs workshop technology
