this book describes the setup of digital enterprises and how to manage them focusing
primarily on the important knowledge and essential understanding of digital enterprise
management required by managers and decision makers in organizations it covers ten essential
knowledge areas of this field foundation of digital enterprise technology foundation and talent

management for digital enterprise digital enterprise strategy planning and implementation digital enterprise e tailing b2c digital enterprise e services b2b digital enterprise and supply chain digital platforms digital marketing and advertising digital payment systems mobile enterprise overall this text provides the reader with the basics to understand the rapid development of digitization facilitated by the dramatic advancements in digital technologies extensively connected networks and wider adoption of computing devices especially mobile devices as more and more organizations are realizing the strategic importance of digitization e g sustainable growth of the organization competitive advantage development and enhancement and are embarking on digital enterprise

this book gathers a collection of high quality peer reviewed research papers presented at international conference on cyber intelligence and information retrieval ciir 2021 held at institute of engineering management kolkata india during 20 21 may 2021 the book covers research papers in the field of privacy and security in the cloud data loss prevention and recovery high performance networks network security and cryptography image and signal processing artificial immune systems information and network security data science techniques and applications data warehousing and data mining data mining in dynamic environment higher order neural computing rough set and fuzzy set theory and nature inspired computing techniques

description generative ai is revolutionizing the way we interact with technology imagine creating hyper realistic images composing original music pieces or generating creative text formats all with the help of ai this book provides a comprehensive exploration of generative ai and its transformative impact across various industries this book begins with the basics of ai explaining ml and design patterns to build a solid foundation it delves deeply into generative ai and then progresses through machine learning deep learning and essential architectures such as cnns gans diffusion rnns lstms and transformers it covers practical applications from regression and classification to advanced use cases such as image generation editing document search content summarization and question answering readers will also learn to build prototypes like a document q a bot research assistant and prompt playground while mastering techniques such as continued pre training fine tuning model merging retrieval augmented generation and agentic ai by the end of this book you will transform from a curious beginner to a confident generative ai user you will possess the knowledge and skills to

explore its capabilities for creative expression problem solving and even business innovation you will be able to confidently navigate the world of generative ai turning your ideas into reality key features explore the entire spectrum of generative ai from fundamental ai concepts to advanced llm applications includes practical examples code snippets and real world case studies to enhance learning and understanding learn how to use generative ai for business applications including ethical considerations what you will learn explore concepts of ai ml deep learning and generative ai learn about computer vision and generative image ai supported by coding examples discover nlp techniques transformer architecture components and generative text ai supported by coding examples understand prompt engineering and llm frameworks while building prototypes examine the role of llm operations throughout the entire llm lifecycle investigate the potential impact of generative ai on enterprises and develop business strategies who this book is for this book is ideal for anyone curious about generative ai regardless of their prior technical expertise whether you are a business professional a student an artist or simply someone fascinated by the future of technology this book will provide you with a clear and accessible understanding of this groundbreaking field table of contents 1 ai fundamentals 2 genai foundation 3 genai for images 4 transforming images with genai 5 genai for text 6 chatgpt 7 large language model frameworks 8 large language model operations 9 generative ai for the enterprise 10 advances and sustainability in generative ai

this book constitutes the proceedings of the 13th international conference on design science research in information systems and technology desrist 2018 held in june 2018 in chennai india the 24 full papers presented in this volume were carefully reviewed and selected from 96 papers the contributions are organized in topical sections named hci and design design foundations design foundations design in healthcare advances in data science and analytics ict for development designing cybersecurity and design applications

by making available the almost unlimited energy stored in prehistoric plant matter coal enabled the industrial age and it still does coal today generates more electricity worldwide than any other energy source helping to drive economic growth in major emerging markets and yet continued reliance on this ancient rock carries a high price in smog and greenhouse gases we use coal because it is cheap cheap to scrape from the ground cheap to move cheap to burn in power plants with inadequate environmental controls in this book mark thurber explains how coal producers users financiers and technology exporters drive this supply chain while

fragmented environmental movements battle for full incorporation of environmental costs into the global calculus of coal delving into the politics of energy versus the environment at local national and international levels thurber paints a vivid picture of the multi faceted challenges associated with continued coal production and use in the twenty first century

get all the important current affairs of july 2019 in one place download the pdf have command over the general awareness section

siegel offers a comprehensive textbook complemented by extensive online support for the fastest growing section of the curriculum across the country complete integration of print and web components allows the accompanying site to act as an extension of the text interactive cases project based activities and new content is regularly updated by the author

this collection compiles research in all areas of the global information domain it examines culture in information systems it in developing countries global e business and the worldwide information society providing critical knowledge to fuel the future work of researchers academicians and practitioners in fields such as information science political science international relations sociology and many more provided by publisher

this handbook highlights the importance of communications and public relations for building a successful organisation mobilising support and helping the organisation achieve its aims and objectives it provides all the basics to help develop an effective communications strategy and a plan of action and covers the main techniques involved including leaflets newsletters publications and reports websites internet mailing video and other audio visual media how to get coverage in the print and broadcast media how to monitor feedback and response the presentation is simple and clear and includes worked examples case studies and exercises the authors also provide useful tips on writing clearly editing illustration and design immensely practical and easy to follow this do it yourself handbook will be of considerable use to ngos public sector organisations those working for social change and anyone interested in communications and public relations

thoroughly revised state of the art semiconductor design manufacturing and operations information written by 70 international experts and reviewed by a seasoned technical advisory board this fully updated resource clearly explains the cutting edge processes used in the

design and fabrication of ic chips mems sensors and other electronic devices semiconductor manufacturing handbook second edition covers the emerging technologies that enable the internet of things the industrial internet of things data analytics artificial intelligence augmented reality and and smart manufacturing you will get complete details on semiconductor fundamentals front and back end processes nanotechnology photovoltaics gases and chemicals fab yield and operations and facilities nanotechnology and microsystems manufacturing finfet and nanoscale silicide formation physical design for high performance low power epitaxi anneals rtp and oxidation microlithography etching and ion implantations physical chemical electrochemical and atomic layer vapor deposition chemical mechanical planarization atomic force metrology packaging bonding and interconnects flexible hybrid electronics flat panel flexible display electronics and photovoltaics gas distribution systems ultrapure water and filtration process chemicals handling and abatement chemical and slurry handling systems yield management cim and factory automation manufacturing execution systems advanced process control airborne molecular contamination esd controls in clean room environments vacuum systems and rf plasma systems ic manufacturing parts cleaning technology vibration and noise design and much more

this collection compiles research in all areas of the global information domain it examines culture in information systems it in developing countries global e business and the worldwide information society providing critical knowledge to fuel the future work of researchers academicians and practitioners in fields such as information science political science international relations sociology and many more provided by publisher

this sourcebook is designed for use through participatory learning methods that involve the learner taking advantage of his her experience and knowledge it is hope that this sourcebook will prove useful in bringing greater attention to poverty and gender concerns in the design implementation and monitoring and evaluation of health policies programmes and interventions
