textbook and will be an essential reference for practitioners site planning consists of forty self contained modules organized into five parts the art of site planning which presents site planning as a shared enterprise understanding sites covering the components of site analysis planning sites covering the processes involved site infrastructure from transit to waste systems and site prototypes including housing recreation and mixed use each module offers a brief introduction covers standards or approaches provides examples and presents innovative practices in sidebars the book is lavishly illustrated with 1350 photographs diagrams and examples of practice

through a transdisciplinary perspective this book examines the complex urban dimension in front of increasing density soil consumption abandoned places and the recent pandemic which proved megacities particularly inadequate to provide healthy psychophysical conditions assuming bodily and emotional comfort as a reference horizon it tends to inspire the design research overcoming a paradoxical binary logic that separates public and private outside and inside culture and nature mind and places the first part of the work explores built spaces and addresses sustainable strategies not only to overcome an ecologic and systemic crisis but also to improve places liveability in our contemporary city the second part deals with our perception of aesthetic spaces welcoming the stimuli coming from neuro aesthetics studies on affordances and atmosphere and encouraging the intersection between interior architecture and design culture and arts the third part examines relational spaces and how they influence human behaviour starting from psychological anthropological and philosophical perspectives the book benefits scholars and practitioners interested in interior architecture and design as well as researchers involved in the relationship between people and places the new challenge posed by the recent pandemic requires more than ever to rely on consciousness culture and creativity to increase the intelligence of our surroundings allowing our sense of belonging and improving our personal and mutual well being

jane jacobs s famous book the death and life of great american cities 1961 has challenged the discipline of urban planning and led to a paradigm shift controversial in the 1960s most of her ideas became generally accepted within a decade or so after publication not only in north america but worldwide as the articles in this volume demonstrate based on cross disciplinary and transnational approaches this book offers new insights into her complex and often contrarian way of thinking as well as analyses of her impact on urban planning theory and the consequences for planning practice now more than 50 years after the initial publication in a period of rapid globalisation and deregulated approaches in planning new challenges arise the contributions in this book argue that it is not possible simply to follow jane jacobs s ideas to the letter but instead it is necessary to contextualize them to look for relevant lessons for cities and planners and critically to re evaluate why and how some of her ideas might be updated bringing together an international team of scholars and writers this volume develops conclusions based on new research as to how her work can be re interpreted under different circumstances and utilized in the current debate about the proclaimed millennium of the city the 21st century

this volume ventures into terrain where even the most sophisticated map fails to lead through the mapmaker s bias denis wood shows how maps are not impartial reference objects but rather instruments of communication persuasion and power like paintings they express a point of view by connecting us to a reality that could not exist in the absence of maps a world of property lines and voting rights taxation districts and enterprise zones they embody and project the interests of their creators sampling the scope of maps available today

illustrations include peter gould s aids map tom van sant s map of the earth u s geological survey maps and a child s drawing of the world the power of maps was published in conjunction with an exhibition at the cooper hewitt museum the smithsonian institution s national museum of design
