the popularity of enterprise architecture ea has increased in the last two decades in both business and academic domains despite the cumulative interest from all sectors the implementation and practice of ea have been entangled with numerous challenges and complexities consequently some organisations continue to theorise the concept which has ramifications on practice and return on investment roi this has led to many studies that have been conducted to understand the complexities impacting the implementation and practice of ea in organisations yet the trajectory of some convolutions remains mystery in many quarters this attributes to the struggle to articulate the value of ea in many environments hence many organisations find it difficult to apply ea for strategic management of modern information technology it solutions enterprise architecture for strategic management of modern it solutions provides guidance on how to employ ea in deploying and managing it solutions from pragmatic and implementable strategies perspectives until now implementation and practice of ea have been slow despite its growing popularity and interest from all sectors the author employs sociotechnical theories such as actor network theory ant

and structuration theory as lenses to examine and explain why and how challenges and complexities exist and derail the implementation or practice of ea in organisations by doing so this serves to enable practitioners and readers to gain fresh insights on why the challenges exist and how they can be addressed in creating collaborative capabilities for business enhancement sustainability and competitiveness the book provides detailed insights on how to apply ea for organisational purposes from three main fronts first it explains the implications that lack of understanding of ea have on organisational activities and processes second it examines the challenges and complexities that hinder the implementation and practice of ea in organisations third it proposes models and frameworks on how ea can be applied for strategic management of modern it solutions in organisations written for postgraduates researchers academics and professionals in the fields of ea it and information systems this book provides a valuable resource that will enable and enhance implementation and practice of ea including future studies

with increasing intensity caad computer aided architectural design is determining the daily work of today's architectural offices computers allow complex designs to be visualized and altered with great speed and accuracy three dimensional models can be created with simulation and animation possibilities and links to the world wide provide access to a flow of information the author develops his thesis that these aspects do not just enable the creative process to be optimized in a quantitative sense but also qualitatively alongside the spatial and time dimensions the new electronic possibilities provide a fifth dimension in architecture

pervasive information architecture explains the why and how of pervasive information architecture ia through detailed examples and real world stories it offers insights about trade offs that can be made and techniques for even the most unique design challenges the book will help readers master agile information structures while meeting their unique needs on such devices as smart phones gps systems and tablets the book provides examples showing how to model and shape information to adapt itself to users needs goals and seeking strategies reduce disorientation and increase legibility and way finding in digital and physical spaces and alleviate the frustration associated with choosing from an ever growing set of information services and goods it also describes relevant connections between pieces of information services and goods to help users achieve their goals this book will be of value to practitioners researchers academics and students in user experience design usability information

architecture interaction design hci web interaction interface designer mobile application design development and information design architects and industrial designers moving into the digital realm will also find this book helpful master agile information structures while meeting the unique user needs on such devices as smart phones gps systems and tablets find out the why and how of pervasive information architecture ia through detailed examples and real world stories learn about trade offs that can be made and techniques for even the most unique design challenges

information architecture is about organizing and simplifying information designing and integrating information spaces systems and creating ways for people to find and interact with information content its goal is to help people understand and manage information and make the right decisions accordingly this updated and revised edition of the book looks at integrated information spaces in the web context and beyond with a focus on putting theories and principles into practice in the ever changing social organizational and technological contexts information architects not only design individual information spaces e g websites software applications and mobile devices but also tackle strategic aggregation and integration of multiple information spaces across websites channels modalities and platforms not only do they create predetermined navigation pathways but they also provide tools and rules for people to organize information on their own and get connected with others information architects work with multi disciplinary teams to determine the user experience strategy based on user needs and business goals and make sure the strategy gets carried out by following the user centered design ucd process via close collaboration with others drawing on the authors extensive experience as hci researchers user experience design practitioners and information architecture instructors this book provides a balanced view of the ia discipline by applying theories design principles and guidelines to ia and ux practices it also covers advanced topics such as iterative design ux decision support and global and mobile ia considerations major revisions include moving away from a web centric view toward multi channel multi device experiences concepts such as responsive design emerging design principles and user centered methods such as agile lean ux and design thinking are discussed and related to ia processes and practices

this book connects the different topics and professions involved in information technology approaches to architectural design ranging from computer aided design building information modeling and programming to simulation digital representation

augmented and virtual reality digital fabrication and physical computation the contributions include experts academic and practical experiences and findings in research and advanced applications covering the fields of architecture engineering design and mathematics what are the conditions constraints and opportunities of this digital revolution for architecture how do processes change and influence the result what does it mean for the collaboration and roles of the partners involved and last but not least how does academia reflect and shape this development and what does the future hold following the sequence of architectural production from design to fabrication and construction up to the operation of buildings the book discusses the impact of computational methods and technologies and its consequences for the education of future architects and designers it offers detailed insights into the processes involved and considers them in the context of our technical historical social and cultural environment intended mainly for academic researchers the book is also of interest to master s level students
