an attempt to free architecture from site and program constraints and to counter the profusion of ever bigger architecture books with ever smaller content some may call it the first manifesto of the twenty first century for it lays down a new way to think about architecture others may think of it as the last architectural treatise for it provides a discursive container for ideas that would otherwise be lost whatever genre it belongs to siteless is a new kind of architecture book that seems to have come out of nowhere its author a young french architect practicing in tokyo admits he didn't do this out of reverence toward architecture but rather out of a profound boredom with the discipline as a sort of compulsive reaction what would happen if architects liberated their minds from the constraints of site program and budget he asks the result is a book that is saturated with forms and as free of words as any architecture book the mit press has ever published the 1001 building forms in siteless include structural parasites chain link towers ball bearing floors corrugated corners exponential balconies radial facades crawling frames forensic housing and other architectural ideas that may require construction techniques not yet developed and a relation to gravity not yet achieved siteless presents an open ended compendium of visual ideas for the architectural imagination to draw from the forms drawn freehand to avoid software specific shapes but from a constant viewing angle are presented twelve to a page with no scale order or end to the series after setting down 1001 forms in siteless conditions and embryonic stages blanciak takes one of the forms and performs a scale test showing what happens when one of these fantastic ideas is subjected to the actual constraints of a site in central tokyo the book ends by illustrating the potential of these shapes to morph into actual building proportions

universal principles of architecture is a concise visual introduction to 100 of the most fundamental elements of architecture

the texts presented in proportion harmonies and identities phi intelligence creativity and fantasy were compiled with the intent to establish a multidisciplinary platform for the presentation interaction and dissemination of research the aim is also to foster the awareness and discussion on the topics of harmony and proportion with a focus on different visions relevant to architecture arts and humanities design engineering social and natural sciences and their importance and benefits for the sense of both individual and community identity the idea of modernity has been a significant motor for development since the western early modern age its theoretical and practical foundations have become the working tools of scientists philosophers and artists who seek strategies and policies to accelerate the development process in different contexts

this book includes the refereed selected papers of the 20th international conference on computer aided architectural design interconnections computing beyond boundaries caad futures 2023 held in delft the netherlands in july 5 7 2023 the 43 full papers included in this book were carefully reviewed and selected from 144 submissions they were organized in topical sections as follows algorithmic architectural design ai powered architectural ideation performance based design urban models and analysis urban design digital design materials and fabrication spatial information data and semantics building data analysis visualisation interaction and building massing and layouts

the 1960s and 1970s avant garde has been likened to an architectural big bang such was the intensity of energy and ambition in which it exploded into the postwar world marked out by architectural projects that redefined the discipline it remains just as influential today references to the likes of archizoom peter eisenman john hejduk and superstudio abound highly diverse the avant garde cannot be defined as a single strand or tendency it was divergent geographically reaching from europe to north america and japan and in its political formal and cultural preoccupations it was unified though as a critical and experimental force critiquing contemporary society against the backdrop of extreme social and political upheaval the paris riots of may 1968 the anti vietnam war movement in america and the looming ecological crisis re imagining the avant garde outlines how in contemporary architectural practice avant garde projects retain their power as historical precedents as barometers of a particular design ethos as critiques of society and instigators of new formal techniques given the far reaching impact of the subsequent digital revolution which has since reshaped every aspect of practice the issue asks why this historical period continues to retain its undeniable grip on current architecture contributors pablo bronstein and sam jacob sarah deyong stylianos giamarelos damjan jovanovic andrew kovacs perry kulper igor marjanovic william menking michael sorkin neil spiller and mimi zeiger featured architects archizoom andrea branzi jimenez lai luis miguel koldo lus arana klaus nemestudio superstudio and urbanlab

as a way to understand the contemporary project in architecture this book provides an index of ideas theories projects and definitions that string into a methodology for evaluating the contemporary language of architecture described as contemporism through a review of topology form and typology system and elements the contemporary project has been trying to answer the postmodern question of how to move beyond modernism through a thread of architectural styles that tried to respond to deficiencies from the modern promise and contextual changes yet

the question remains should this ongoing struggle to move beyond modernism be a stylistic battle has the present architectural practice ever left the modernist tendencies and is there a structure for a contemporary language in architecture this book presents a collection of highly illustrated projects that have worked under these parameters to break away from modernism in order to present a holistic integration of topology and typology as a language for contemporism the index is illustrated with individual spreads which can be read sequentially or independently and encourages the reader to make their own connections it also includes interviews and contributions from toyo ito anthony vidler ben van berkel christian kerez and greg lynn this book is essential reading for undergraduate and graduate students in architecture

different contract procedures adopted on civil engineering projects are studied in this revised edition taking into account the new developments the new coverage includes comments on various related books and new forms of contract that have been published

since the 1980s the diagram has become a preferred method for researching communicating theorising and making architectural designs ideas and projects thus the rise of the diagram as opposed to the model or the drawing is the one of the most significant new developments in the process of design in the late 20th and early 21st centuries diagrams of architecture is the first anthology to represent through texts and diagrams the histories theories and futures of architecture through the diagram spanning the pre historic to the parametric diagrams of architecture illustrates over 250 diagrams and brings together 26 previously published and newly commissioned essays from leading international academics architects theorists and professional experts these combine to define the past and future of the diagram s discourse prefaced with a critical introduction by mark garcia each text investigates a central concept or dimension of the diagram ranging from socio cultural studies science philosophy technology cad cam computing and cyberspace and virtual digital design to methodology environment sustainability and phenomenological poetic and art architecture as well as interior urban engineering interactive and landscape design the first critical multidisciplinary book on the history theory and futures of the architectural diagram includes seminal articles on the diagram from the history and theory of architecture such as those by peter eisenman sanford kwinter mvrdiv neil spiller lars spuybroek un studio and anthony vidler features 14 newly commissioned articles by leading architects and theorists including charles jencks hanif kara patrik schumacher neil spiller leon van schaik and alejandro zaera polo and two new interviews with will alsop and bernard tschumi includes a full colour critical

collection of over 250 of the most significant and original diagrams many of which are previously unpublished in the history of architecture from around the world
