what do teachers need to know in order to teach well how important is the depth and quality of teachers content knowledge as a critical aspect of their ability to teach how can teachers best be educated and how can we assess their accomplishments as teachers in what ways is the professional preparation of teachers comparable to the preparation of physicians and other members of learned professions what kinds of educational research can provide deeper understanding of teaching learning and the reform of education these are just some of the many questions answered in this landmark collection of lee shulman s best work a pioneer in the field of teaching and teacher research shulman s work and thinking have long influenced teachers and researchers but while shulman is one of the most widely cited scholars in education his writings have been scattered among a variety of books and journals until now the wisdom of practice at last makes shulman s major works on k 12 education and teacher education available in one volume his interests in teaching of all sorts in k 12 schools in teacher education in graduate programs for educational researchers in liberal education have been diverse the essays included touch on such wide ranging topics as the psychology of school subjects medical problem solving teacher knowledge performance assessment teaching in higher education the scholarship of teaching and learning the characteristics and pedagogies of the professions the role of cases in professional education and research and the character of relevant and rigorous educational research

teachers know how complicated their work is they constantly balance considerations of individual students with those of the group they think about how past events affect today s lessons and they constantly adapt and revise for future lessons but few people ever get to see teachers work in this way the most energizing relational complicated inspiring disheartening parts of teaching remain largely invisible over nearly a decade at the carnegie foundation for the advancement of teaching désirée pointer mace worked with dozens of teachers across the country to open their doors by creating multimedia web based representations of teaching practice this book describes how such multimedia representations are envisioned documented created and shared and how others might engage in this process this practical book examines the cutting edge of electronic media documentation of teaching practice features cases studies that represent diverse grades cultures and contexts with both novice and veteran teachers provides clear examples of how multimedia representations of teaching can be used as alternative texts in teacher learning environments describes the positive outcomes for teachers and learners when teaching is made public includes screen images of teachers websites as well as classrooms and children participating in projects

i found the book excellent and read every one of the 450 pages many of the chapters reflect the fielding institute s focus on human and organizational behaviour educational leadership and organizational management the book will be particularly appropriate for readers from a corporate training or business

school background though there is much for academics and online educators at all levels and subject areas to learn from this well crafted book there are many books and articles about online learning this is one of the better ones robin mason computers and education technology mediated instruction has taken the university and the corporate sector by storm as more instructors teach online for a dispersed learning community in both academic and business environments there s a need for resources that will help them adapt to this new teaching method educators who come out of traditional academic institutions tend to use traditional methods when offering courses online e g lectures textbooks and readings examinations rather than attend to small group processes and principles of what the editors of this volume call andragogy this handbook goes beyond the mechanics of how to create and direct an online learning experience to consider such a new approach to pedagogy in doing so the editors primary purpose is to clarify the conceptual issues that underlie effective online teaching and to offer practical guidance to educators and corporate trainers who plan to teach in a virtual environment their central tenet is the adoption of computer networks as the teaching vehicle of the future demands a re examination of our core beliefs about pedagogy and how students learn the transfer of a classroom curriculum into cyberspace is deceptively simple but doing so without an appreciation of the nuances and implications of learning online ignores not only the potential of this medium but the inevitable realities of entering it rather than fear the challenges that new technology brings to systems of learning the editors hope to help instructors embrace it by re thinking how knowledge is acquired and how educational processes may be optimally designed in a new age of teaching and learning features benefits part i provides an overview and includes discussion of the unique structural aspects of the electronic learning environment pedagogical issues curriculum design psychological and group dynamics and ethical issues part ii examines practical issues associated with implementing courses online both in the traditional university setting and in professionalrporate training environments the book draws heavily on personal case examples many from the fielding graduate institute s 26 years of teaching in nontraditional distributed learning environments
