we are delighted to present the ecdl 2004 conference proceedings from the 8th european conference on research and advanced technology for digital braries at the university of bath bath uk this followed an impressive and geographicallydispersedseriesof locationsfor previousevents pisa 1997 h aklion 1998 paris 1999 lisbon 2000 darmstadt 2001 rome 2002 and trondheim 2003 the conference re ected the rapidly evolving landscape of digital libraries both in technology developments and in the focus of approaches to implem tation an emphasis on the requirements of the individual user and of diverse and distributed

user communities was apparent in addition the conference programme began to address possibly for the first time the associated themes of e research e science and e learning and their relationship to digital libraries we observed increasing commonality in both the distributed information architectures and the technical standards that underpin global infrastructure developments digital libraries are integral to this information landscape and to the creation of increasingly powerful tools and applications for resource discovery and knowledge extraction digital libraries support and facilitate the data and information flows within the scholarly knowledge cycle and provide essential enabling functionality for both learners and researchers the varied and innovative research activities presented at ecdl 2004 demonstrate the exciting potential of this very fast moving field the 148 papers 43 posters 5 panels 14 tutorials and 4 workshops submitted this year were once again of the highest quality

the turn of the 20th century was a time of great change in Britain the empire saw its global influence waning and its traditional social structures challenged there was a growing weariness of industrialism and a desire to rediscover tradition and the roots of English heritage a new interest in English folk song and dance inspired art music which many believed was seeing a renaissance after a period of stagnation since the 18th century this book focuses on the lives of seven composers Ralph Vaughan Williams Gustav Holst Ernest Moeran George Butterworth Philip Heseltine Peter Warlock Gerald Finzi and Percy Grainger whose work was influenced by folk songs and early music each chapter provides an historical background and tells the fascinating story of a musical life

this new thoroughly updated edition of Bradt's Tibet encompasses the wider region of ethnic Tibet with more detailed coverage of the Amdo and Kham regions than is found in other guides it also includes essential information on new border openings and is particularly strong on map data which is extremely difficult to find in Tibet itself including new theme maps covering a range of topics from Tibetan regions to the three parallel rivers UN World Heritage sites sacred landscapes permafrost and major river sources Bradt's Tibet benefits from years of consistent research Michael Buckley has been visiting and researching Tibet for more than 30 years and has a raft of books to his name thanks to his knowledge and expertise Bradt's Tibet offers a more extensive language appendix than is found in other guidebooks plus essential

seminar paper from the year 2012 in the subject energy sciences grade 1 5 language english abstract the energy efficiency targets of the federal government are important parameters deciding upon the amount of energy we will need in the future and hence about the storage capacities we will require the reduction of the primary energy consumption by 20 until 2020 and 50 until 2050 towards 2008 s figures the reduction in electricity consumption by 10 until 2020 and 25 until 2050 the doubling of the rate of refurbishment from 1 to 2 per year and the reduction of the end energy consumption in the mobility sector by 10 until 2020 and 40 by 2050 towards 2005 s consumption will change the energy market substantially for instance houses will need less electricity for their devices and less gas for heating load profiles will smoothen and passenger and freight traffic will switch from petrol engines to electric and gas engines fuel cells or will switch to rail in germany the market structure has been designed to enhance and facilitate the development of renewable energies through the renewable energies act eeg and the energy economy law enwg and actually in 2011 the share of renewables in the electricity production totalled to over 20 and is expected to rise over 25 this year whereby especially the photovoltaic is booming with growth rates of nearly 50 the evolutions are certainly pleasant still the very quick development of these mostly decentralised and location dependent energy sources is making the market framework conditions come to its limits the transmission grid capacities are not large enough to transfer the huge amounts of wind energy from the north to the south and the distribution grid is often too weak to feed in the large amounts of photovoltaic energy in the midday these restrictions have caused 407 gwh of wind energy to get lost in 2011 150 gwh in 2010 a small but exploding figure and a valid argument for storage capacities this shows that the whole of the energy market has to be evaluated and diverse scenarios for the future have to be created to forecast the development into one specific area additionally because of the dynamic of this market these analyses and forecasts have to be updated continuously in the context of these recent events and developments the following paper will discuss how the need for storage capacities could be met by the

power to gas technology noting the need for flexibility close market maturity and economic affordability
