the sea is a prestigious series with a history going back to the classic three volume treatise published by wiley in 1962 63 now under the leadership of allan robinson the series is again being extended with five new volumes currently planned that emphasizing the interaction of physical chemical and biological oceanography coastal ocean phenomena is the first of these new volumes and it deals with the general principles governing ocean phenomena in regions of shallower water near land processes such as tidal effects global sea level changes biological productivity and sediment transport are analyzed models and methods are emphasized including remote sensing models of coastal ocean circulation and data acquisition volume 10 presents the general principles and volume 11 is organized geographically to presents the results of 35 of regional studies eastern north america the caribbean the north sea and baltic the mediterranean sea and so forth volume 10 is a readable and systematic introduction to coastal oceanography that is suitable for use with college courses while volume 11 is a much larger reference work note that volumes 10 and 11 are available together as a set isbn 0471 11543 6 tent 175 00

cleo publications in frontiers in marine science foreword josef aschbacher director of esa s earth observation programmes satellite data have drastically changed the view we have of the oceans covering about 70 of earth s surface oceans play a unique role for our planet and for our life but large areas remain unexplored and are difficult to reach since the 1980s earth orbiting satellites have helped to observe what is happening at the ocean surface sensors like czcs avhrr seawifs and modis provided the first ocean colour data from space starting in 2002 esa s medium resolution imaging spectrometer meris on board the environmental satellite envisat provided detailed information on phytoplankton biomass and concentrations of other matter in the global oceans these satellite observations laid the groundwork for studying the marine environment and how it responds to climate change and the research community has since delivered information on the variability of marine ecosystems part of this work is reflected in this stunning collection of peer reviewed publications presented at the workshop colour and light in the ocean from earth observation cleo held at esa s esrin site in Frascati Italy on 6 8 september 2016 the event attracted more than 160 participants from all over the world including remote sensing experts marine ecosystem modelers in situ observers and users of earth observation data scientifically the meeting

covered applications in climate studies over primary productivity and ocean dynamics to pools of carbon and phytoplankton diversity at global and regional scales it also demonstrated the potential of earth observation and its contribution to modern oceanography looking to the future new satellites developed by esa under the coordination of the european commission will further our scientific and operational observations of the seas with sentinel 3a in orbit and its twin sentinel 3b following in 2017 there is a new category of data available for operational oceanographic applications and climate studies for years to come these data are free and easy to access by anyone interested looking at the role of oceans in our daily lives i am sure that this collection of scientific excellence will be valued by scientists of today and will inspire the next generation to carry these ideas into the future

reprint of the original first published in 1875

vols 10 11 include meteorology of england by james glaisher as seperately paged section at end
