the fourteen contributions testify to the increasing co operation which is bringing together biologists primatologists archaeologists psychologists linguists and anthropologists who share a common interest in the study of social and cultural behaviour from an evolutionary perspective the papers derived from a royal society british academy meeting range in topic from cultural and social behaviour among non human primates through the interaction of cognitive development with social organization during the upper palaeolithic to behaviour including linguistic behaviour among modern humans this volume reflects the important recent developments in such areas as behavioural ecology evolutionary psychology and the origin and function of language

why are animal signals reliable this is the central problem for evolutionary biologists interested in signals of course not all signals are reliable but most are otherwise receivers of signals would ignore them a number of theoretical answers have been proposed and empirical studies made but there still remains a considerable amount of confusion the authors one a theoretician the other a fieldworker introduce a sense of order to this chaos a significant cause of confusion has been the tendency for different researchers to use either the same term with different meanings or different terms with the same meaning the authors attempt to clarify these differences a second cause of confusion has arisen because many biologists continue to assume that there is only one correct explanation for signal reliability the authors argue that the reliability of signals is maintained in several ways relevant in different circumstances and that biologists must learn to distinguish between them in this book they explain the different theories give examples of signalling systems to which one or another theory applies and point to the many areas where further work both theoretical and empirical is required

safety management in the workplace is an issue of critical importance to business managers as well as those responsible for ohs in any organisation however although the concepts of safety culture and risk have become increasing matters of concern and are often discussed they are concepts that are not often clearly understood this new book from professor andrew hopkins focuses on these concepts and deals with the complex issues in a clear informative style that will both inform organisations and companies and assist them to be better able to create safe environments for their employees and clients and to mitigate risk content the first three parts of the book advocate the development of risk awareness part 1 is a general discussion of organisational culture part 2 is an empirical investigation of how organisational culture affects safety using the glenbrook train crash as a case study part 3 is a second case study of how organisational culture interfered with safety focussing on the f111 inquiry at amberley air force base queensland part 4 is an extended discussion of the concept of risk dealing with issues such as the assumption that risk can be objectively measured the current view that risk is a product of likelihood and severity the conflict between acceptable risk and as low as reasonably practical the tendency of risk management to become risk spreading rather than risk reduction and the confusion between risk and hazard oxford university press australia new zealand is the non exclusive distributor of this title

this book the fifth in the series food safety assurance and veterinary public health has been conceived by a total of 33 internationally recognised experts from 11 different countries in europe and from the usa canada and australia with backgrounds ranging from veterinary medicine animal science biology and microbiology to psychology philosophy and ethics it provides an up to date overview of the science of animal welfare and its assessment of options for the assessment and management of risks for the welfare of production animals and of the ramifications these may have for the safety of foods of animal origin this volume is targeted at veterinary practitioners official veterinarians in a control function animal and food scientists welfare scientists students in animal welfare auditing and inspection officials and risk managers at all levels of animal production other publications in the food safety

assurance and veterinary public health series are volume 1 food safety assurance in the pre harvest phase volume 2 safety assurance during food processing volume 3 risk management strategies monitoring and surveillance volume 4 towards a risk based chain control

the third edition of this successful textbook looks again at the influence of natural selection on behavior an animal s struggle to survive by exploiting resources avoiding predators and maximizing reproductive success in this edition new examples are introduced throughout many illustrated with full color photographs in addition important new topics are added including the latest techniques of comparative analysis the theory and application of dna fingerprinting techniques extensive new discussion on brood parasite host coevolution the latest ideas on sexual selection in relation to disease resistance and a new section on the intentionality of communication written in the lucid style for which these two authors are renowned the text is enhanced by boxed sections illustrating important concepts and new marginal notes that guide the reader through the text this book will be essential reading for students taking courses in behavioral ecology the leading introductory text from the two most prominent workers in the field second colour in the text new section of four colour plates boxed sections to illustrate difficult and important points new larger format with marginal notes to guide the reader through the text selected further reading at the end of each chapter

psychology library editions comparative psychology 16 volume set brings together a number of titles which explore animal behaviour and learning some in isolation but mostly comparing it with human behaviour research in this area looks at many different issues using various methods and examines species from insects to primates the series of previously out of print titles originally published between 1928 and 1997 with the majority from the 1970s and 1980s includes contributions from many highly respected authors
