at a time when asia is rapidly growing in global influence this much needed and insightful book bridges two major current policy topics in order to offer a unique study of the latest smart city archetypes emerging throughout asia highlighting the smart city aspirations of asian countries and their role in asian governments new development strategies this book draws out timely narratives and insights from a uniquely asian context and policymaking space

the present book highlights studies that show how smart cities promote urban economic development the book surveys the state of the art of smart city economic development through a literature survey the book uses 13 in depth city research case studies in 10 countries such as the north america europe africa and asia to explain how a smart economy changes the urban spatial system and vice versa this book focuses on exploratory city studies in different countries which investigate how urban spatial systems adapt to the specific needs of smart urban economy the theory of smart city economic development is not yet entirely understood and applied in metropolitan regional plans smart urban economies are largely the result of the influence of ict applications on all aspects of urban economy which in turn changes the land use system it points out that the dynamics of smart city gdp creation takes different paths which need further empirical study hypothesis testing and mathematical modelling although there are hypotheses on how smart cities generate wealth and social benefits for nations there are no significant empirical studies available on how they generate urban economic development through urban spatial adaptation this book with 13 cities research studies is one attempt to fill in the gap in knowledge base

the smart city concept together with the growing importance of the un s sustainable development goals has a significant impact on city management and governance this book examines real cases of smart city management across asia and europe it covers regions such as iceland estonia poland germany india indonesia malaysia singapore and vietnam to systemize the knowledge in the field it evaluates smart cities efficiency and analyzes and assesses the standards norms and best practices involved in the management of smart cities the book answers questions such as what it is that makes smart cities stand out why some countries in europe and asia have more smart cities than others whether smart cities support the economy and gdp growth of the country and what the main determinants of forming smart cities in asia and europe are it also evaluates whether smart cities secure higher standards of living for their citizens as compared to regular cities many theoretical concepts and theories are developed and then verified from the perspective of western economies central eastern european and asian countries are frequently overlooked thus examining the smart city idea from the viewpoint of non western economies offers a fresh insight into the concept and its adaptation and evolution the range of issues analyzed in the book are multilayered and approached from a wide array of perspectives from macroeconomics to management finance and technology and public policy thus the book is addressed to researchers students and academics who specialize in sustainable and regional development economic geography and management it will also be of interest to urban planners

environmental scientists and policymakers

acknowledging the smart cities phenomenon not as a future goal but as an active part of our present this book critically examines the strategies business models practices tools and actions needed to ensure that smart cities deliver the solutions they promise

smart city programs and strategies have become one of the most dominant urban agendas for local governments worldwide in the past two decades the rapid urbanization rate and unprecedented growth of megacities in the 21st century triggered drastic changes in traditional ways of urban policy and planning leading to an influx of digital technology applications for fast and efficient urban management with the rising popularity in making our cities smart several domains of urban management urban infrastructure and urban quality of life have seen increasing dependence on advanced information and communication technologies icts that optimize and control the day to day functioning of urban systems smart cities essentially act as digital networks that obtain large scale real time data on urban systems process them and make decisions on how to manage them efficiently the book presents 26 chapters which are organized around five topics 1 conceptual framework for smart cities and communities 2 technical concepts and models for smart city and communities 3 civic engagement and citizen participation 4 case studies from the global north and 5 case studies from the global south

this book reviews the structure applications technologies governance environmental sustainability smart communities gender space and other issues related to smart cities the book is divided into four parts the first one entails the conceptual background growth and development the second part presents diverse issues on smart cities in terms of environmental sustainability the role of the community and gender space among others the third part revolves around economic and technological issues and the fourth is a compilation of case studies in connection with smart cities this collection of diverse issues from different locations presents a holistic view of smart cities contributed by authors who have undertaken research projects and implemented their own unique perspectives and methods a variety of innovative concepts such as digital governance polycentric structures geodata repositories geoweb services and advanced geospatial technologies in smart city planning urban microclimatic parameters and urban heat islands provide invaluable knowledge for researchers and practitioners in these fields

smart cities are seen as the new way of securing sustainable urban development to address pressing issues of global urbanization sustainability is still often conceived through an environmental lens yet any change in the built environment has implications for the social dimension of sustainability social sustainability is a dynamic concept that combines design of the physical realm with the design of the social world and promotes infrastructure to support social needs and concerns while smart cities primarily aim at enhancing performance through an innovative use of digital data and technology a social sustainability perspective stresses the critical interconnections between people and place through a critical literature review this thesis establishes a dialogue between the smart city and social sustainability it evaluates the smart city concept from a social sustainability perspective within a built environment paradigm a multi stage conceptual framework is advanced to study both the social objectives and outcomes of smart city policies the conceptual framework aims to extract the major contextual social sustainability thematic factors and to evaluate the nature and nuances of social dimensions in smart cities this is applied to the case of smart cities mission scm in india a multi scalar analysis evaluates the social environment of the smart cities at three levels an overall examination of the mission guidelines analysis of 100 smart cities aspirations and an empirical focus on the two smart cities bhubaneswar and faridabad the analysis shows that the deliberation on global smart cities still lacks focus on social equity and inclusion scm acknowledges the significance of social sustainability to achieve balanced urban growth with references to social capital inclusion and equity infrastructure and collaboration however the study indicates that they are not comprehensively delivered this thesis systematically identifies an array of challenges and opportunities of the 100 scm in india to develop smart social cities the broader message of the research is that social sustainability is an integral component of the urban agenda and appropriate steps must be taken to align social needs with urban development under the increasingly common but elusive smart city banner

over the past decade building smarter resilient cities is an established global trend in urban development including developing countries unexpected external shocks disasters and damage from climate change have major impacts on sustainable growth and well being for citizens in today s cities and requires comprehensive solutions to deal with these negative events cities predominantly invest in hard physical infrastructure with less attention on non physical soft assets which are intangible in nature and more difficult to quantify but essential to achieve effective balanced sustainable development the value of soft assets can be substantial and consistent implementation by cities can generate diverse value and be transformative for their urban

development for that purpose cities need to establish an appropriate strategy framework and structure to incorporate soft assets during the plan and implementation of hard infrastructure this book argues that integrating soft assets in smart resilient city development is critical to make the hard infrastructure work effectively and create value for cities the literature review underlines that soft capital can be defined as 1 human 2 institutional 3 external 4 technology and information and 5 social the book also examines how soft assets can be effectively integrated into and create value for smart resilient city development based on previous findings and original research a unique approach is adopted through the verification of different city level approaches using the concept of influential nodes showcasing layered and composite value creation the analysis addresses innovative implementation factors which enhance disaster resilience and the environment which is particularly relevant for cities in developing countries drawing on previous research in depth reviews new data and case studies the book provides new insights and specific policy and action measures to enhance the utilization of soft asset components in parallel with hard infrastructure in smart and resilient city in developing countries

the asia and the pacific region is actively seeking ways to optimise the use and availability of its natural resources which have been contributing to environmental degradation and hindering its sustainable development this volume documents and promotes various initiatives showcasing the efforts countries in the region are making towards the implementation of the sdgs this book is part of the 100 papers to accelerate the implementation of the un sustainable development goals initiative

smart cities play a crucial role in the development of a new india the smart city is a red hot topic on the urban strategy of governments all over the country humanity faces a variety of problems due to the increasing population including food water and energy shortage crowded cities environmental destruction and global warming with introduction of a new mission 100 smart cities and 500 cities in india will be rejuvenated and transformed through smart cities mission and amrut scheme smart city has been interpreted quite liberally because of the fact that each city has its own history culture and ecology smart city mission offers great opportunity of developing cities in the context of sustainable development this study explores the changes and challenges for achieving sustainable and environment friendly urbanization it also makes attempts to understand the development of cities by case study methodology by studying the proposals of few cities and progress that has taken place

smart cities promise to generate economic social and environmental value through the seamless connection of urban services and infrastructure by digital technologies however there is scant evidence of how these activities can enhance social well being and contribute to just and equitable communities smart and sustainable cities pipedreams practicalities and possibilities provides one of the first examinations of how smart cities relate to environmental and social issues it addresses the gap between the ambitious visions of smart cities and the actual practices on the ground by focusing on the social and environmental dimensions of real smart city initiatives as well as the possibilities they hold for creating more equitable and progressive cities through detailed analyses of case studies in the united states australia the united kingdom japan germany india and china the contributors describe the various ways that social and environmental issues are interpreted and integrated into smart city initiatives and actions the findings point towards the need for more intentional engagement and collaboration with all urban stakeholders in the design development and maintenance of smart cities to ensure that everyone benefits from the increasingly digitalised urban environments of the twenty first century the chapters in this book were originally published as a special issue of the journal local environment
