perspective has been a divided subject orphaned among various disciplines from philosophy to gardening in the first book to bring together recent thinking on perspective from such fields as art history literary theory aesthetics psychology and the history of mathematics james elkins leads us to a new understanding of how we talk about pictures elkins provides an abundantly illustrated history of the theory and practice of perspective looking at key texts from the renaissance to the present he traces a fundamental historical change that took place in the way in which perspective was conceptualized first a technique for constructing pictures it slowly became a metaphor for subjectivity that gradual transformation he observes has led to the rifts that today separate those who understand perspective as a historical or formal property of pictures from those who see it as a linguistic cognitive or epistemological metaphor elkins considers how the principal concepts of perspective have been rewritten in work by erwin panofsky hubert damisch martin jay paul ricoeur jacques lacan maurice merleau ponty and e h gombrich the poetics of perspective illustrates that perspective is an unusual kind of subject it exists as a coherent idea but no one discipline offers an adequate exposition of it rather than presenting perspective as a resonant metaphor for subjectivity a painter s tool without meaning a disused historical practice or a model for vision and representation elkins proposes a comprehensive revaluation the perspective he describes is at once a series of specific pictorial decisions and a powerful figure for our knowledge of the world

this book is a defense of perspectivism in the age of post truth at the crossroads of science art and philosophy it unearths a tradition that we must rediscover the point of view is not only what divides it is also what is shared today perspective is associated with individualism and personal viewpoints but in an age of post truth the only robust answer to relativism lies in fact in a reappraisal of perspectivism in discussion with contemporary new realisms of various sorts this book makes a case why perspectivism alone can avoid us falling back into epistemological naivetés a journey into the history of optics art philosophy and social psychology this book unearths the forgotten tradition of perspectiva communis which makes perspective the vector of a common horizon this book argues that vision is never

immediate rather to see through is the key to understanding the perspectival operation we never see by ourselves all seeing must pass through something other than itself through the mediation and the detour of an apparatus or the witness of a third party besides the theoretical framework for this new approach to perspective this book presents a series of case studies ranging from innovative interpretations of classical authors and key moments in the history of art from ancient painting trompe l'oeil and brunelleschi's experiment in renaissance florence to the issue of perspective in the work of contemporary artists such as robert smithson the share of perspective will be of interest to scholars and advanced students working in aesthetics phenomenology art history and the history of sciences

psychoanalysis is a historical discourse of suffering and healing under conditions of modernity rather than a metaphysical discourse of universal truth and must be so due to the ontological indeterminacy of psychic life demonstrating this proceeds through the substantiation of two primary theses first pluralism in psychoanalysis thus the perspectival character of psychoanalytic knowing is irreducible second psychic life is partially pliable to interpretive constitution rather than a self subsistent object domain fully available to third personal objective description together these theses provide the framework for a radical rethinking of the authority of psychoanalytic knowledge and practice and of the nature of psychoanalytic claims to objectivity psychoanalytic interpretations are best understood as existentially interrogative they test who and how one might be and if successful to some extent identity formative the validity conditions of psychoanalytic knowledge thus concern the creation discovery of satisfactory forms of practice orienting self narration rather than those regularly operative in the natural sciences however an adequate assessment of psychoanalytic claims requires that the claims of science are given due consideration and the impediments to practice orienting self narration under conditions of late modernity are acknowledged
