the golden age of postwar capitalism has been eclipsed and with it seemingly also the possibility of harmonizing equality and welfare with efficiency and jobs most analyses believe the the emerging postindustrial society is overdetermined by massive convergent forces such as tertiarization new technologies or globalization all conspiring to make welfare states unsustainable in the future social foundations of postindustrial economies takes a second more sociological and more institutional look at the driving forces of economic transformation what as a result stands out is postindustrial diversity not convergence macroscopic global trends are undoubtedly powerful yet their influence is easily rivalled by domestic institutional traditions by the kind of welfare regime that some generations ago was put in place it is however especially the family economy that hold the key as to what kind of postindustrial model will emerge and to how evolving tradeoffs will be managed twentieth century economic analysis depended on a set of sociological assumptions that now are invalid hence to better grasp what drives today s economy we must begin with its social foundations

a companion to europe since 1945 provides a stimulating guide to numerous important developments which have influenced the political economic social and cultural character of europe during and since the cold war includes 22 original essays by an international team of expert scholars examines the social intellectual economic cultural and political changes that took place throughout europe in the cold war and post cold war periods discusses a wide range of topics including the single market european american relations family life and employment globalization consumption political parties european decolonization european identity security and defence policies and europe s fight against international terrorism presents europe in a broad geographical conception to give equal weighting to developments in the eastern and western european states

in recent years major social forces such as ageing populations social trends migration patterns and the globalization of economies have reshaped social welfare policies and practices across the globe multinational corporations ngos and other international organizations have begun to influence social policy at a national and local level among the many ramifications of these changes is that globalizing influences may hinder the ability of individual nation states to effect policies that are beneficial to them on a local level with contributions from thirteen countries worldwide this collected work represents the first major comparative analysis on the effect of globalization on the international welfare state the welfare state in post industrial society is divided into two major sections the first draws from a number of leading social welfare researchers from diverse countries who point to the nation state as case studies highlighting how it goes about establishing and revising social welfare provisions the second portion of the volume then moves to a more global perspective in its analysis and questioning of the impact of globalization on citizenship ageing and marketization the welfare state in post industrial society seeks to

encourage debate about the implications of the most pressing social welfare issues in nation states and integrate analyses of policy and practice in particular countries struggling to provide social welfare support for their needy populations

post industrial socialism provides critical analysis of recent developments in leftist political thought adrian little charts new directions in the economy and the effects they have had on traditional models of social welfare and orthodox approaches to social policy in demonstrating the limitations of the welfare state and the associated concept of citizenship this book suggests that we need to renew socialist welfare theory through the evaluation of universal welfare provision and a policy of breaking the link between work and income

little comparative knowledge exists on how the radical transformations that constitute the late 20th century s era of globalization have affected gender relations and their particular structural manifestation on the labor market thereby neglecting a core element of the changes and problems currently underway this book analyses how converging tendencies in the life courses and employment careers of men and women interfere with developments of increasing diversity and instability both within and between sexes as economies move from industrial to global using the shifting welfare regimes of west germany and denmark as illustrative evidence of how national context genders the risks and chances associated with globalization and increasing employment flexibility this study provides a timely comprehensive longitudinal analysis of the gendered career consequences of recent political and economic change

annotation geography basics examines the fundamentals of world geography its first volume addresses the question of what the study of geography is and then explores five basic fields physical geography biogeography and natural resources human geography economic geography and political geography the bulk of volume 2 is a glossary containing nearly 1 600 definitions of basic geography terms all the essays in geography basics are taken from the first volume of salem s world geography 2001 and its glossary and appendices are taken from the eighth volume of the same set these are the materials that address the broadest aspects of geography what the field is all about how it is organized what issues it addresses geography basics thus answers the kinds of questions that are in fact most basic to the field
