this volume provides a unified and accessible account of recent developments regarding the real homotopy type of configuration spaces of manifolds
configuration spaces consist of collections of pairwise distinct points in a given manifold the study of which is a

classical topic in algebraic topology one of this theory's most important questions concerns homotopy invariance if a manifold can be continuously deformed into another one then can the configuration spaces of the first manifold be continuously deformed into the configuration spaces of the second this conjecture remains open for simply connected closed manifolds here it is proved in characteristic zero i.e. restricted to algebrotopological invariants with real coefficients using ideas from the theory of operads a generalization to manifolds with boundary is then considered based on the work of Campos Ducoulombier Lambrechts Willwacher and the author the book covers a vast array of topics including rational homotopy theory compactifications p-ads forms propagators Kontsevich integrals and graph complexes and will be of interest to a wide audience

companion reader to Anna Leon Guerrero's Social Problems 2nd edition

a remarkable book that addresses the ways in which children respond to literature across a variety of everyday classroom situations the result is a balanced resource for teachers who want to deepen their understanding of literature and literary engagement

includes an unpaginated appendix royal warrant holders and 1914 war honours supplement
