university technology commercialization and entrepreneurship including property based institutions such as research parks and incubators entrepreneurship in the public sector the first systematic analysis and synthesis of the new interdisciplinary literature on technology commercialization and entrepreneurship at universities while the book reflects the complexities of debate around these topics it will be an important guide to the area for academics graduate and advanced undergraduate students of business studies economics entrepreneurship and innovation studies the book also provides a roadmap of specific recommendations for managers and policymakers

this book explores the origin and future of upgrade culture a collection of cultural habits and orientations based on the assumption that new technologies will rapidly perpetually and inevitably emerge by analyzing discourses of technological change and the practices of marketing workers inside the consumer technology industry between the early 1980s and the late 2010s the book describes the genesis maintenance and future of upgrade culture based on archival and popular sources first hand interviews with a range of industry professionals and participant observations at industry only events the book attends to issues both intimate to the culture of marketing work and structural to the organization of the consumer technology industry this book will have a broad appeal to social cultural theorists of technology marketing and consumerism as well as to scholars in business history communication cultural studies media studies sociology and anthropology the introduction of this book is freely available as a downloadable open access pdf under a creative commons attribution non commercial no derivatives 4.0 license taylorfrancis.com/chapters/oa-monograph/10.4324/9781003193869_1 introduction adam richard rottinghaus context ubx refid 1bb75408 b5c2 4a69 bd20 082a73a77920

in this book fifteen prominent scholars of the economy business and technology argue that technical change can fruitfully be interpreted as an institutionally structured learning process these essays show that the analysis of knowledge generating institutions including firms industries patenting systems and occupations provides important insights into the pace direction and persistence of technological change the authors use these insights to both reshape economic theory and reinterpret the economic development of britain the usa germany and japan

creative technological change draws upon a wide range of thinking from organisational theory innovation studies and the sociology of

technology it explores the different ways in which these questions have been framed and answered especially in relation to new virtual technologies the idea of metaphor is used to capture the differences between and strengths and weaknesses of various ways of conceptualising the technology organisation relationship this approach offers the possibility of developing new ways of thinking about viewing and ultimately responding creatively to the organisational challenges posed by technological change

technological change is exciting as much as it is daunting the arrival of new digital tools affects consumption patterns types of employment and working conditions and can pose challenges to organizations and individuals alike indeed although technological change is a factor for economic growth it can also be an amplifier or even a catalyst of inequality it is also a social change and interacts in complex ways technology is both the source and the consequence of social transformation to understand technological change and to harness its effects this book studies transformations at different levels societal organizational and individual in its analysis of the subject it also draws on a number of disciplines of the human and social sciences such as anthropology sociology and psychology

social research study of the impact of technological change and innovation on social change in the usa annotated bibliography pp 96 to 124 and references

society and technological change continues to be the essential text for exploring the relationship between human societies and the ever evolving landscape of technology the ninth edition follows the historical trajectory of technological development and its profound impact on various aspects of human life from communication and healthcare to economic systems and governance at the same time it shows how these technologies have themselves been shaped by social economic cultural and political forces and that the study of technology is important not just for its own sake but also for what it tells us about the kinds of societies we make for ourselves with its engaging writing style and thought provoking content this new edition continues to be an indispensable resource for students scholars and anyone seeking a deep understanding of the intricate bond between society and technology in our ever evolving world back cover

theoretical contributions technological infrastructure technological assets and development international flows of technology technological investment in the private sector returns to technological activities policy issues

technological change gathers together examples of the best current thinking on methodology and the theoretical perspectives that are increasingly of concern to historians of technology whilst at the same time presenting other papers which reflect the state of the art in key areas of historical debate the volume emphasises the need both to establish a common forum for theoretical and empirical research and also to delineate the shared concerns of these two treatments which are too often reflected as conflicting rather than mutually supportive approaches to the writing of the history of technology

this book tackles the issue of technological and economic catch up by examining the role that public research institutions and local policy play in the promotion of this process by fostering local science technology linkages with incoming foreign owned multinationals

in this wide ranging exposition of the various economic theories of technological change stanislaw gomulka relates them to rates of growth experienced by different economies in both the short and the long term analysis of countries as diverse as japan the soviet union and the united kingdom demonstrates that there is an interdependence between technological change and the institutional and cultural characteristics of different countries which can have a profound effect on their rates of growth all of the major relevant models are discussed including those of kuznets and phelps but throughout the emphasis is on the creation of a unified theoretical framework to help explain the impact of technological progress on both a micro and a macro scale
