until recently simulation modeling was regarded as the domain of powerful computers and highly skilled programmers but that is no longer the case thanks to the spreadsheet simulation modeling is now accessible to anyone with a microcomputer students and teachers public officials engineers and planners and ordinary citizens concerned about the environment in modeling the world in a spreadsheet timothy cartwright explains how to create models of different environmental phenomena ranging from natural processes such as the dispersion of water and air pollution to social processes such as housing affordability he also describes models for some of the most exciting topics in current computer research including artificial life cellular decision making and chaos and fractals written for both experts and nonexpert the book provides complete recipes for building and running the models in the most popular spreadsheet programs such as lotus 1 2 3 supercalc excel quattro and others a 3 diskette containing lotus or supercalc data files for all fourteen models may be ordered using a tear out card that accompanies the book spreadsheet software is required

practical spreadsheet modeling using risk provides a guide of how to construct applied decision analysis models in spreadsheets the focus is on the use of monte carlo simulation to provide quantitative assessment of uncertainties and key risk drivers the book presents numerous examples based on real data and relevant practical decisions in a variety of settings including health care transportation finance natural resources technology manufacturing retail and sports and entertainment all examples involve decision problems where uncertainties make simulation modeling useful to obtain decision insights and explore alternative choices good spreadsheet modeling practices are highlighted the book is suitable for graduate students or advanced undergraduates in business public policy health care administration or any field amenable to simulation modeling of decision problems the book is also useful for applied practitioners

seeking to build or enhance their spreadsheet modeling skills features step by step examples of spreadsheet modeling and risk analysis in a variety of fields description of probabilistic methods their theoretical foundations and their practical application in a spreadsheet environment extensive example models and exercises based on real data and relevant decision problems comprehensive use of the risk software for simulation analysis including a free one year educational software license

as the market leading textbook on the subject project management the managerial process 4e is distinguished by its balanced treatment of both the technical and behavioral issues in project management as well as by its coverage of a broad range of industries to which project management principles can be applied it focuses on how project management is integral to the organization as a whole the 4th edition reflects the latest changes found in the practice other texts discuss the topics covered in this text but they do not view oversight as the project manager s operating environment as does gray larson

this book fills a void for a balanced approach to spreadsheet based decision modeling in addition to using spreadsheets as a tool to quickly set up and solve decision models the authors show how and why the methods work and combine the user s power to logically model and analyze diverse decision making scenarios with software based solutions the book discusses the fundamental concepts assumptions and limitations behind each decision modeling technique shows how each decision model works and illustrates the real world usefulness of each technique with many applications from both profit and nonprofit organizations the authors provide an introduction to managerial decision modeling linear programming models modeling applications and sensitivity analysis transportation assignment and network models integer goal and nonlinear programming models project management decision theory queuing models simulation modeling forecasting models and inventory control models the additional material files chapter 12 excel files for each chapter excel modules for windows excel modules for mac 4th edition errata can be found at degruyter com view product 486941

about the book this book is wholly dedicated to the art of exploratory spreadsheet modeling real problems that readers encounter on a day to day basis are presented with the aim of helping them derive applicable principles and link principles to practice users of this book will find it a refreshing learning guide and handy reference resource it offers 101 spreadsheet exercises and tools including a chapter featuring another 101 business challenges that readers can practice as modeling projects introduced for the first time in this third edition is a set of discovery points 46 in total they are included to enlighten readers and instructors

on the underlying exploratory thinking employed in the exercises though the book can be used with different versions of microsoft excel libreoffice and openoffice calc and other spreadsheet application software this edition only presents excel 2010 13 spreadsheet features and functions and visual basic for application in its appendices the notes for older excel versions and openoffice calc and basic from the earlier editions and the newly added libreoffice calc and basic are now found in a new online learning center that accompanies this book completed spreadsheet workbooks in the different spreadsheet versions are also provided there this way the book should remain helpful for any person whether a novice beginner or expert to learn business modeling using basic and advanced spreadsheet features as well as macro programming new in this edition discovery points to better support underlying thinking and give pointers to guide business problem exploration these are more general than the comments in the concept sub section of exercises and they are ideas many experienced modelers use intuitively listed at the start of each chapter to help consolidate the learning for seasoned modelers and make it easier for instructors to impart the art of modeling to students these points can be used for self discovery class discussion and project team deliberations they can be applied to various settings and exercises found in this book problem sets provides a means to test students to ensure that learning has taken place at the correct pace a separate question sets of assignments quizzes and examinations apart from the exercises in the book these are simpler and more defined problems for students to practice and be evaluated on their spreadsheet skills the questions with given data are easier and the harder questions are marked with an asterisk target audience undergraduates graduate students and professionals involved in business development finance accounting and operations
