a thorough introduction to modern ideas on cosmology and on the physical basis of the general theory of relativity an introduction to the science of cosmology explores various theories and ideas in big bang cosmology providing insight into current problems assuming no previous knowledge of astronomy or cosmology this book takes you beyond introductory texts to the point where you are able to read and appreciate the scientific literature which is broadly referenced in the book the authors present the standard big bang theory of the universe and provide an introduction to current inflationary cosmology emphasizing the underlying physics without excessive technical detail the book treats cosmological models without reliance on prior knowledge of general relativity the necessary physics being introduced in the text as required it also covers recent observational evidence pointing to an accelerating expansion of the universe the first several chapters provide an introduction to the topics discussed later in the book the next few chapters introduce relativistic cosmology and the classic observational tests one chapter gives the main results of the hot big bang theory next the book presents the inflationary model and discusses the problem of the origin of structure and the correspondingly more detailed tests of relativistic models finally the book considers some general issues raised by expansion and isotropy a reference section completes the work by listing essential formulae symbols and physical constants beyond the level of many elementary books on cosmology an introduction to the science of cosmology encompasses numerous recent developments and ideas in the area it provides more detailed coverage than many other titles available and the inclusion of problems at the end of each chapter aids in self study and makes the book suitable for taught courses

the value at risk measurement methodology is a widely used tool in financial market risk management the fifth edition of professor moorad choudhry s benchmark reference text an introduction to value at risk offers an accessible and reader friendly look at the concept of var and its different estimation methods and is aimed specifically at newcomers to the market or those unfamiliar with modern risk management practices the author capitalises on his experience in the financial markets to present this concise yet in depth coverage of var set in the context of risk management as a whole topics covered include defining value at risk variance covariance methodology portfolio var credit risk and credit var stressed var critique and var during crisis topics are illustrated with bloomberg screens worked examples and exercises related issues such as statistics volatility and correlation

are also introduced as necessary background for students and practitioners this is essential reading for all those who require an introduction to financial market risk management and risk measurement techniques foreword by carol alexander professor of finance university of sussex

this contemporary introduction to the principles and research base of cultural ecology is the ideal textbook for advanced undergraduate and beginning graduate courses that deal with the intersection of humans and the environment in traditional societies after introducing the basic principles of cultural anthropology environmental studies and human biological adaptations to the environment the book provides a thorough discussion of the history of and theoretical basis behind cultural ecology the bulk of the book outlines the broad economic strategies used by traditional cultures hunting gathering horticulture pastoralism and agriculture fully explicated with cases illustrations and charts on topics as diverse as salmon ceremonies among northwest indians contemporary maya agriculture and the sacred groves in southern china this book gives a global view of these strategies an important emphasis in this text is on the nature of contemporary ecological issues how peoples worldwide adapt to them and what the western world can learn from their experiences a perfect text for courses in anthropology environmental studies and sociology

health planning is a critical component when responding to the health needs of low and middle income countries characterised by particularly stringent resource constraints the major communicable diseases such as aids tb and malaria often appear in parallel with growing non communicable diseases including heart disease and diabetes and yet resources are often less than the levels recommended by the world health organisation for basic health care the new edition of this well respected text explains the importance of health planning in both developing regions such as africa and those in transition such as central and eastern europe it stresses the importance of understanding the national and international context in which planning occurs and provides an up to date analysis of the major current policy issues including health reforms separate chapters are dedicated to the distinct issues of finance for health care and humanresource planning the various techniques used at each stage of the planning process are explained starting with the situational analysis and then looking in turn at priority setting option appraisal programming implementation monitoring and evaluation the book ends by examining the challengesfacing planners in the 21st century particularly in the light of growing globalisation a major theme of the book is the need to recognise and reconcile the inevitable tension that lies between value judgements and rational

decision making as such in addition to introducing techniques such as costing and economic appraisal it also outlines techniques such as stakeholder analysis for understanding the relative attitudes and power of different groups in planning decisions each chapter includes a comprehensive bibliography including key websites a summary and exercises to help the reader practise techniques and better understand the content the book argues that all health professionals and community groups should be involved in the planning process for it to be effective and will therefore appeal to anyone involved in planning

a book on legal philosophy necessarily focuses attention on law in addition to this focus an introduction to an african legal philosophy focuses attention on philosophy the link between law and philosophy is brought into relief which is done through an african context an attempt is made to spell out what is african about legal philosophy without being cut off of african legal philosophy from non african legal philosophy the book draws attention to the view that a basic component of african legal philosophy consists of an investigation of what it is to be an african and because an african is a human being among other human beings the investigation is about what it is to be a human being ubuntuism is an african derived word that captures this mode of being human moreover because human beings are cultural beings african cultural context guides the investigation inescapably it is claimed that every legal philosophy is embedded in a culture african legal philosophy is not an exception it is deeply rooted in african culture a culture that is today shaped in part by a european colonialist culture one feature that will strike one as one reads the book is that the book approaches african legal philosophy as a means of decolonization of african culture african legal philosophy can accomplish this intelligently and effectively if it is itself decolonized in doing this it contrasts sharply with mainstream western legal philosophy

introduces the reader to the views of the most outstanding theologians in the history of christianity the book s three sections deal with patristic theology medieval and reformation theology and modern theology

macroscopic electrodynamics is a comprehensive two semester introductory graduate level textbook on classical electrodynamics for use in physics and engineering programs the word macroscopic is intended to indicate both the large scale nature of the theory as well as the fact that emphasis is placed upon applications of the so called macroscopic maxwell equations to idealized media this book emphasizes principles and practical methods of analysis which are often presented in fresh and original ways illustrative examples are carefully chosen to promote

the students physical intuition and are worked out in detail to give students a thorough grounding in solution techniques the style is informal yet mathematically sound and presumes only a basic familiarity with electrodynamics such as may be obtained in a one semester junior level undergraduate class at the end of each chapter many original problems are provided which illustrate or expand upon specific sections of the text the problems are at the heart of the text and are meant to encourage students develop confidence and emphasize ideas while avoiding both oversimplification and inordinate calculational difficulties

this is the final work of one of the most influential american philosophers of the twentieth century after many years of investigation throughout a long and distinguished career this book represents marvin farber s definitive answer to the question of the nature and function of philosophy originally a follower of husserl farber can be credited with bringing phenomenology to the attention of american philosophy in his later years he abandoned phenomenology for a kind of naturalism and subsequently called himself a marxist this volume which he had been working on since his retirement from active teaching is the culmination of farber s analytical abilities his earlier career was highlighted with many milestones as well along with publishing phenomenology as a method and as a philosophical discipline in 1928 his first book which served to introduce phenomenology to the united states farber organized the international phenomenological society he became its first president in 1931 and began publishing the journal philosophy and phenomenological research the next year in 1940 he published philosophical essays in memory of edmund husserl a collection of essays by a number of husserl s more distinguished followers many of whom had emigrated to the united states farber s other books include foundation of phenomenology naturalism and subjectivism he coauthored philosophy for the future the quest of modern materialism the search for an alternative considers the nature of philosophy discussing husserl marx lenin and farber s own ideas on phenomenology primarily concerned with the philosophy of philosophy and the analysis of contemporary versions of phenomenology and marxism the author contributes penetrating and profound insights on other fundamental philosophical topics such as the nature of value of essences of structure and of possibility and potentiality
