ever since mankind has thought that we have to be civilized socialized live in harmony with each other leaving our earth safe for generations to come making air and water cleaner for generations to come and leaving these clean since then we have intensified the practice of understanding explaining and learning and starts teaching each other and as a result we have conceptualized schools for our children and strive to show them systematically to our own our families the responsibilities towards our society our earth and environment and how we have to prepare our children for all these responsibilities prepare them and for these purposes a program of education has been prepared in schools and different different countries and civilizations in their own ways have prepared these programs according to their own needs and presented it to their children in schools in order to teach these programs methodically to children educational plans arrangements and a class of teachers have been prepared it is only natural that the more we learn the more civilized and gentle we become but it has also been seen that this so called knowledge gives us somewhere with the feeling that i have come to know everything and now i can teach others and in the importance of teaching this we go through the airs and this pride starts to appear in our words thoughts and behavior and it is a basic vision than to see others as poor and ignorant a disorder is created that causes our learning to stop and at the same time we prove to be obstructive instead of helping others learn when the teacher is presented in front of the children in the classroom it is readily accepted by the children just like the parents because the children believe that school is also the form of home and we should learn here to live confidently for the life ahead of us to be

prepared for the big reason is also that learning is the living tendency of human beings and it happens naturally all organisms have the ability to learn naturally and accordingly they also have learning instruments the systems of education the concerns of education basically have to accept that every child is ready to learn the basic tendency of learning is inherent in all children all children are capable of learning so one can learn this thing one cannot learn should not be born out all the teachers will have to reflect on their behavior that we are all in the learning phase only the difference of experience has happened i am more experienced than you and all of you will go through learning experiences as life progresses because school is a social responsibility the experiences here will be a little more organized which has been thought by the system of education and some experienced teachers that such experiences will take our children on the right path according to our education concerns this book makes a small effort in this direction that let us all present ourselves to our children in the spirit of learning so that we can connect meet and integrate with our children so that we prove to be helpful in their learning and be not obstructive let us take a pledge to be helpful in the learning of our children and present ourselves to the children with the desire to remain in the learning moods forever

this is a surprising and welcome book a heartening read that shows the power of assessment for learning and the potential for academics and teachers jointly to put into practice ideas that can improve classroom learning and teaching tes the starting point of this book was the realisation that research studies worldwide provide hard evidence that development of formative assessment raises students test scores the significant improvement in the achievements of the students in this project confirms this research while providing teachers teacher trainers school heads and others leaders with ideas and advice for improving formative assessment in the classroom assessment for learning is based on a two year project involving thirty six teachers in schools in medway and oxfordshire after a brief review of the research background and of the project itself successive chapters describe the specific practices which teachers found fruitful and the underlying ideas about learning that these

developments illustrate later chapters discuss the problems that teachers encountered when implementing the new practices in their classroom and give guidance for school management and less about promoting and supporting the changes this book offers valuable insights into assessment for learning as teachers describe in their own words how they turned the ideas into practical action in their schools

this provocative and accessible text is addressed to prospective and practicing teachers who believe schools must be fundamentally reformed to meet student needs in an information age drawing on interviews with frontline educators the authors integrate descriptive accounts of learning and teaching in schools today with emerging multicultural curricula information technologies organizational structures that support innovations and democratic dialogue jones and maloy offer analytic perspectives for rethinking the social historical and philosophical foundations of education along with strategies for teacher renewal and organizational change adopting a constructivist developmental approach to learning the authors identify endemic dilemmas that increasingly handicap industrial era schools a stagnant economy heightens tensions due to class race and gender inequities hierarchically structured corporations and representative politics perpetuate business domination computers offer possibilities for more open communication flexible organizations and democratic discourse alternative visions of the future that engage students can renew cooperation collaboration and community in schools and society
