this book presents research contributions focussing on the introduction of contemporary physics topics mainly but not exclusively quantum physics into high school curricula despite the important advances and discoveries in quantum physics and relativity which have revolutionized our views of nature and our everyday lives the presence of these topics in high school physics education is still lacking in this book physics education researchers report on the teaching and learning of quantum

physics from different perspectives and discuss the design and use of different pedagogical approaches and educational pathways there is still much debate as to what content is appropriate at high school level as well what pedagogical approaches and strategies should be adopted to support student learning currently there is a greater focus on how to teach modern physics at the high school level rather than classical physics however teachers still lack experience and availability of appropriate teaching and learning materials to support the coherent integration of quantum physics in high school curricula all of the 19 papers presented in this book discuss innovative approaches for enhancing physics education in schools

the research in physics education has to do with the search of solutions to the complex problem of how to improve the learning and teaching of physics the complexity of the problem lies in the different fields of knowledge that need to be considered in the research in fact besides the disciplinary knowledge in physics which must be considered from the conceptual the historical and the epistemological framework one has to take into account some basic knowledge in the context of psychology and the cognitive sciences for the general and contextual aspects of learning and some basic knowledge in education and communication for what concerns teaching skills and strategies looking back at the historical development of the research one may recognize that the complexity of the endeavour was not clear at first but became clear in its development which shifted the focus of the research in the course of time from physics to learning to teaching we may say that the research started more than 30 years ago with a focus on disciplinary knowledge physicists in different parts of the western world after research work in some field of physics decided to concentrate on the didactical communication of

physical knowledge
