this historic book may have numerous typos and missing text purchasers can usually download a free scanned copy of the original book without typos from the publisher not indexed not illustrated 1872 edition excerpt very great quickness in the bringing of objects within the field of view can be soon acquired the eye becomes educated to a remarkable keenness of vision by continued practice when observations are made with the telescope or when messages are being received by it by signals nothing must be taken for granted and nothing considered as been until it has been positively in view and so clearly as not to admit of doubt never presume to anticipate what signals will follow from those already made a signal must never be considered or announced as read until it has been actually seen carefully watch the communicating station until the last signals are made and be very certain before

ceasing to watch that the signal for the end of a message has been distinctly given the officers at each signal station must take care that a lookout through the glass is kept at each station so constantly that no signal can be shown at any time at the communicating station for more than two minutes without receiving an answer for this reason when not at the glass himself he will cause his men or any one on duty at the station to keep a regular glass watch assigning the men by turns and fixing particular hours for each that responsibility for neglect may be easily traced these details will relieve each other every two or four hours day and night the watchman on duty must be seated at the glass and before assuming his station must with the aid of the soldier last on duty make certain that he knows the exact position of the observed station and that it is plainly in the field of the glass this precaution is particularly necessary at night when the least movement of the glass may have thrown the station out of view all

this is a reproduction of a book published before 1923 this book may have occasional imperfections such as missing or blurred pages poor pictures errant marks etc that were either part of the original artifact or were introduced by the scanning process we believe this work is culturally important and despite the imperfections have elected to bring it back into print as part of our continuing commitment to the preservation of printed works worldwide we appreciate your understanding of the imperfections in the preservation process and hope you enjoy this valuable book the below data was compiled from various identification fields in the bibliographic record of this title this data is provided as an additional tool in helping to ensure edition identification a manual of signals for the use of signal officers in the field and for military and naval students military schools etc albert james myer united states army signal corps gov t print off 1879 history military united states biography autobiography military history military united

excerpt from manual of visual signaling of the u s signal corps so it may be said that visual signals are either transient or permanent transient when each signal disappears as soon as made permanent when the signal remains for a time in view as when flags are kept hoisted to be read or a symbol is retained in a certain position all systems of signals are based upon the principle that having a certain number of elementary signals each in some way distinguishable from the other they are made to appear singly or together in all possible arrangements and combinations necessary to form other signals it may be necessary to know the number of signals that can be made with any given number of available elementary signals where the elementary signal is used only once in each display or where it may be used repeatedly up to the given number of places in the signal which it is desired to display under these conditions the possible number of different signals may be determined from the rules for the equation of arrangements about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing
