in recent years communication scholars have taken a renewed interest in analyzing the audience and its impact on the communication process similarly news editors and producers have often turned toward a marketing orientation which seeks to give new readers and viewers what they want or at least what they say they want yet there has still been little written about just how the audience factors into the news which is produced seeking to fill that niche this book argues that audience images are quite important in the construction of news but not easily detected that is because journalists are not principally interested in their audience they are interested in the news use this paragraph only for general catalogs this volume argues that although journalistic images of the audience may be incomplete they do exist and powerfully help shape the work of journalists in producing journalistic texts using a case study of news workers and news texts at two chicago newsgathering organizations the chicago tribune and wgn tv this book examines notions of audience and how they have been treated by academicians presents a detailed description of the ways in which audience is embedded within the news construction process presents a very representative set of journalistic news values presents differing ideas of audience at three key levels of the news organizations reporters and news gatherers editors and producers and senior editors producers and news directors and seeks to summarize and position this study within the larger body of mass communication research

in this account of the growth of newspapers in modern industrial society helen hughes traces the development of a mass audience through analysis of the origins of the human interest story in the popular ballads of an earlier day she shows how such commonly found interests as a taste for news of the town ordinary gossip and moving or gripping tales with a legendary or mythic quality have reflected the tastes of ordinary folk from the days of illiterate audiences

to the present she explains how these interests ultimately were combined with practical economic and political information to create the substance and demand for a popular press in describing the rise and fall of newspaper empires each with their special readership attractions dr hughes shows how technological innovation and idiosyncratic creativity were used by owners to capture and hold a reading audience once this audience developed it could be fed a variety of messages beamed at reinforcing and maintaining both general and specific publics as well as a view of the world consonant with that of the publisher and major advertisers hughes offers a persuasive argument for the continuing viability of this method for combined social control instruction and amusement captured by the association of news and the human interest story

major changes in media in the late 19th and early 20th centuries challenged traditional ideas about artistic representation and opened new avenues for authors working in the modernist period modernist authors reactions to this changing media landscape were often fraught with complications and shed light on the difficulty of negotiating understanding and depicting media the author of competing stories modernist authors newspapers and the movies argues that negative depictions of newspapers and movies in modernist fiction largely stem from worries about the competition for modern audiences and the desire for control over storytelling and reflections of the modern world this book looks at a moment of major change in media the dominance of mass media that began with the primarily visual media of newspapers and movies and the ways that authors like ernest hemingway zora neale hurston james joyce djuna barnes and others responded the author contends that an examination of this moment may facilitate a better understanding of the relationship between media and authorship in our constantly shifting media landscape

most news media are data rich but analysis poor when it comes to election polling since election polls clearly have the power to influence campaigns and election post mortems it is important that spin not take precedence over significance in the reporting of poll results in this volume experts in the media and in academe challenge the conventional approaches that most news media take in their poll based campaign coverage the book reports new research findings on news coverage of recent presidential elections and provides a myriad of examples of how journalists and news media executives can improve their analysis of poll data thereby better serving our political processes
