gain practical skills in machine learning for finance healthcare and retail this book uses a
hands on approach by providing case studies from each of these domains you ll see examples

that demonstrate how to use machine learning as a tool for business enhancement as a domain expert you will not only discover how machine learning is used in finance healthcare and retail but also work through practical case studies where machine learning has been implemented machine learning applications using python is divided into three sections one for each of the domains healthcare finance and retail each section starts with an overview of machine learning and key technological advancements in that domain you ll then learn more by using case studies on how organizations are changing the game in their chosen markets this book has practical case studies with python code and domain specific innovative ideas for monetizing machine learning what you will learn discover applied machine learning processes and principles implement machine learning in areas of healthcare finance and retail avoid the pitfalls of implementing applied machine learning build python machine learning examples in the three subject areas who this book is for data scientists and machine learning professionals

this book presents mathematical tools to solve partial differential equations typical of physical problems it explains in a detailed manner the process of solving the problems that typically arise in the context of physics although there are a large number of textbooks on this topic few go so deep into the topic one of the original and unique features of this book is emphasis on the mathematical formulation of the problems as well as the analysis of several alternative ways to solve them importantly the book provides a graphical analysis of the results when appropriate it describes a wide scope of the problems with detailed solutions and the methods involved ranging from cases in one to three dimensions from cartesian to polar cylindrical and spherical coordinates and includes properties and applications of the fourier transform to solve partial differential equations

hari suman naik takes the perspective of modular systems and investigates how to enable non expert users to innovate and design by simplifying toolkit solution space new production technologies like digital fabrication and modular electronics along with appropriate toolkits can offer users a significant design flexibility to innovate solutions that meet their heterogeneous and sticky needs the author contributes towards understanding and designing toolkit solution space first using qualitative studies to explore mechanisms for simplifying the use and structure of toolkit solution space and then using a design study of an innovative toolkit the findings are relevant to innovation and product managers eager to incorporate
