the second mexican meeting on mathematical and experimental physics brought together scientists from many different fields the meeting was divided into three symposia i materials science and applied physics ii statistical physics and beyond iii gravitation and cosmology this proceedings presents the papers of the gravitation and cosmology symposium the main goal of the gravitation and cosmology symposium was to present the perspectives of scientists in the fields of cosmology and gravitation regarding their current work as well as the anticipated development of their research fields in the near future

in this article the author attempts to demonstrate that the study of inland fisheries can provide additional insight into the culture of the meybrat a tribal community living around the ayamaru lakes in the northern part of the western bird s head of irian jaya the author discusses the following the significance of pusaka sacred hereditary goods in fishery the role of ancestor worship and cosmology the rise of a class of native immigrant big men such as bankers in ikat textiles kain timur the role of imported kain pusaka as part of the so called kain timur complex newly discovered aspects of myths from the western and eastern bird s head that are often culturally imposed

problems review and discussion questions

the authors of this book are presenting the written materials ascribed to the early greek philosophers c 585 b c 400 b c and the historical context in which those writings occurred

this book explores virgil s poetic and mythical transformation of roman imperialist ideology the romans saw an analogy between the ordered workings of the natural universe and the proper functioning of their own expanding empire between orbis and urbs in combining this cosmic imperialism with the military and panegyric themes proper to epic virgil draws on a number of traditions the notion that the ideal poet is a cosmologist the use of allegory to extract natural philosophical truths from mythology and poetry especially homer the poetic use of hyperbole and the universal expression virgil s imagination is dominated by the cosmological poem of lucretius the aeneid like the de rerum natura is a poem about the universe and how man should live in it but virgil s constant inversion of lucretian values makes of him an anti lucretius recent criticism has tended to stress the pessimistic and private sides of the aeneid but any easy conclusion that the poet was at heart anti augustan is precluded by the depth and detail with which he develops the imperialist themes discussed in this book
