today s world of rapid social technological and behavioral change provides new

opportunities for communications with few limitations of time and space through these communications people leave behind an ever growing collection of traces of their daily activities including digital footprints provided by text voice and other modes of communication meanwhile new techniques for aggregating and evaluating diverse and multimodal information sources are available to security services that must reliably identify communications indicating a high likelihood of future violence in the context of this changed and changing world of communications and behavior the board on behavioral cognitive and sensory sciences of the national research council presents this volume of three papers as one portion of the vast subject of threatening communications and behavior the papers review the behavioral and social sciences research on the likelihood that someone who engages in abnormal and or threatening communications will actually then try to do harm the focus is on how the scientific knowledge can inform and advance future research on threat assessments in part by considering the approaches and techniques used to analyze communications and behavior in the dynamic context of today s world the papers in the collection were written within the context of protecting high profile public figures from potential attach or harm the research however is broadly applicable to u s national security including potential applications for analysis of communications from leaders of hostile nations and public threats from terrorist groups this work highlights the complex psychology of threatening communications and behavior and it offers knowledge and perspectives from multiple domains that contribute to a deeper understanding of the value of communications in predicting and preventing violent behaviors

the explosion of scientific information is exacerbating the information gap between richer poorer educated less educated publics the proliferation of media technology and the popularity of the internet help some keep up with these developments but also make it more likely others fall further behind this is taking place in a globalizing economy and society that further complicates the division between information haves and have nots and compounds the challenge of communicating about emerging science and technology to increasingly diverse audiences journalism about science and technology must fill this gap yet journalists and journalism students themselves struggle to keep abreast of contemporary scientific developments scientist aided by public relations and public information professionals must get their stories out not only to other scientists but also to broader public audiences funding agencies increasingly expect their grantees to engage in outreach and education and such activity can be seen as both a survival strategy and an ethical imperative for taxpayer supported university based research

science communication often in new forms must expand to meet all these needs providing a comprehensive introduction to students professionals and scholars in this area is a unique challenge because practitioners in these fields must grasp both the principles of science and the principles of science communication while understanding the social contexts of each for this reason science journalism and science communication are often addressed only in advanced undergraduate or graduate specialty courses rather than covered exhaustively in lower division courses even so those entering the field rarely will have a comprehensive background in both science and communication studies this circumstance underscores the importance of compiling useful reference materials the encyclopedia of science and technology communication presents resources and strategies for science communicators including theoretical material and background on recent controversies and key institutional actors and sources science communicators need to understand more than how to interpret scientific facts and conclusions they need to understand basic elements of the politics sociology and philosophy of science as well as relevant media and communication theory principles of risk communication new trends and how to evaluate the effectiveness of science communication programmes to mention just a few of the major challenges this work will help to develop and enhance such understanding as it addresses these challenges and more topics covered include advocacy policy and research organizations environmental and health communication philosophy of science media theory and science communication informal science education science journalism as a profession risk communication theory public understanding of science pseudo science in the news special problems in reporting science and technology science communication ethics

designed for introductory business and organizational communication classes this text focuses on teaching students to master the four essential elements of effective communication setting goals knowing the audience mastering skills and managing anxiety basic communication contexts interpersonal group and public speaking are applied to the business setting the fifth edition addresses current challenges to business communication presented by new technology the global marketplace and diversity within the workforce real world applications practicing business communication boxes examine communication practices in a wide range of businesses strategic skills give students tools they will need as they transition from the classroom to a business setting ethical issues boxes challenge students to think critically about the role ethics takes in business communication
