this volume s goal is to provide readers with up to date information on the research and theory of scientific text comprehension it is widely acknowledged that the comprehension of science and technological artifacts is very difficult for both children and adults the material is conceptually complex there is very little background knowledge for most individuals and the materials are often poorly written therefore it is no surprise that students are turned off from learning science and technology

given these challenges it is important to design scientific text in a fashion that fits the cognitive constraints of the learner the enterprise of textbook design needs to be effectively integrated with research in discourse processing educational technology and cognitive science this book takes a major step in promoting such an integration this volume provides an important integration of research and theory with theoretical methodological and educational applications includes a number of chapters that cover how science text information affects mental representations and strategies introduces important suggestions about how text design and new technologies can be thought of as pedagogical features and establishes academic text taxonomies and a consensus of the criteria to organize inferences and other mental mechanisms

the study of terminology has always occupied a unique place in the field of specialized language research its object the terminology of various domains encompasses more than just the descriptive linguistic level of lexicology and its application specialized lexicography morphology syntax and the textual level as well as the role of culture in communication are all fields in which terminology has its specific functions and potential in the history of the discipline several centers for the research and instruction of terminology emerged however the study of terminology in russia has been largely overlooked by its european neighbors the time has come to offer an in depth look into the research being performed and to demonstrate the vitality of the current research landscape today s terminology research in russia makes a lasting balanced impression in this diverse and wide ranging volume which presents many ideas for further research

full of field tested implementation tools this comprehensive handbook shows how schools and districts can use the balanced curriculum process to put their schools on the track to success

vols for 1911 13 contain the proceedings of the helminothological society of washington issn 0018 0120 1st 15th meeting

this new book focuses on the that latest research gains in the field of educational technology which is a creative blending of idea and product technologies with subject matter content in order to engender and improve teaching and learning processes educational technology is often associated with the terms instructional technology or learning technology product technologies are tangible for example computer hardware or software idea technologies are cognitive frameworks or schemes for example the multiple intelligence theory proposed by howard gardner when products are thoughtfully blended with subject matter content such as mathematics or science concepts for a specific audience in a specific educational context such as a school one is using educational technology the words educational

and technology in the term educational technology have the general meaning educational technology is not restricted to the education of children nor to the use of high technology
