examination of the universal phenomenon of the city from a historical perspective considering how and why cities took the shape they did

kostof follows the city shaped with a brilliant study of the component parts that make up urban life all cities consist of certain basic elements streets parks public places and boundaries and it is to these day to day pieces of urban experience that this book turns providing a fascinating understanding of walls fortifications placement of green space and the fringe areas where city and country meet illustrations

economic and societal systems continually evolve as the needs and demands of society change with the development of new technologies research and discoveries various opportunities emerge for venture development and developing economies crowdfunding and sustainable urban development in emerging economies provides innovative research on current issues in the rise of new platforms for digital activities a collaborative economy crowdsourcing crowdfunding and other activities that are shaping developing countries highlighting a range of pertinent topics such as infrastructure finance tertiary educational institutions and urban sustainability this book is an important resource for academicians practitioners researchers and students

of all the elements of a neighborhood the pattern of streets and their infrastructure is the most enduring given the 20th century s additions to the range of transportation means trains subways buses trucks bicycles motorbikes and cars all vying for space and effectiveness a fresh look at the streets is warranted this book contributes a new system of neighborhood design with a focus on contemporary planning priorities drawing lessons from historic and current development it proposes a new pattern more fitting for modern culture addressing such issues as walkability mobility health safety security cost and greenhouse gas emissions case studies of national and international neighborhoods and districts based on the new network model demonstrate its application in real world situations instructors considering this book for use in a course may request an examination copy here

manhattan s public spaces production revitalization commodification analyzes a series of architectural works and their

contribution to new york's public space over the past few decades by exploring a mix of urban mechanisms supportive frameworks legal systems and planning guidelines for the transformation of the city's collective realm the text frames manhattan as a controversial landscape of interests and concerns to authorities communities and very importantly developers the production revitalization and commodification of manhattan's public spaces as a phenomenon and as a subject of study also highlights the vicissitudes of the reconciliation of the many different agents which are part of the process the challenge of the book does not only lie in the analysis of good design but more importantly in how to understand the functional mechanisms for the current trends in the production of space for public use a complex framework of actors governance and market monopolies which invites the reader to participate in the debate of how these interventions contribute or not to an inclusive environment anchored in the existing built fabric manhattan's public spaces invites reflection on the revitalization of the city's shared space from all dimensions beautifully illustrated in black and white with over 50 images this book will be of interest to scholars and students in architecture planning and urban design

in this superbly illustrated book xiaofei chen presents the first analysis in english of a ubiquitous east asian urban phenomenon the supergrid and superblock urban structure the book opens with an introductory essay by barrie shelton in which he sets the scene for what is to follow emphasizing how alien this structure was to western urban design culture where radial patterns of development were the norm then in her first chapter chen explains the make up of the supergrid and superblock urban structure and its contrasting chinese and japanese forms in the following three chapters she digs deep into the history cultural origins and underlying design philosophy of the supergrid and superblock to show how under different cultural influences the model has developed into two distinct forms two further chapters 5 and 6 provide detailed analysis of two sample superblocks in china in xi'an and nanjing and two in japan in kyoto and osaka to reveal the relative advantages and disadvantages of how the structure is manifest in the two countries in her conclusion she discusses her findings to show how and why the supergrid and superblock structure is a valuable urban design model which with regional adjustments can be used effectively in cities other than those of east asia

spiro kostof the renowned architectural historian and chronicler of urban form presents a universal history of the elements of cities streets public places urban divisions and the borders of city and countryside this is both an independent study and a companion volume to professor kostof's book the city shaped which dealt with cities as complete entities now he follows the evolution of their components and traces the story right up to the present showing how the issues remain fresh and engage with our own day often in unexpected ways he also discusses urban process the effect on cities of natural disasters such as the great fire of london and the lisbon earthquake war and comprehensive redevelopment compared with traditional patterns of incremental growth and change this is at once an exercise in architectural and social history a case study for the present and a pointer for the future

this book analyzes the role of integrated spatial planning in constructing eco-sustainable urban housing in post-conflict scenarios and investigates two different spaces in an emergency zaatari refugee camp in jordan and damascus city in syria the book presents a new innovative tool that assists in building a successful and sustainable reconstruction after emergencies which corresponds to the planning approach's heterogeneous nature within emergency situations the same innovative theoretical framework also covers the ramifications of climate change on the urban built environment and reduces its sociological impact on the stricken communities this book is intended for researchers academics students spatial planners policy makers think tank groups and public entities who are interested in post-disaster reconstruction and the issues of refugee camps

current urban planning systems are not equipped to deal with the major urban challenges of the twenty-first century including effects of climate change resource depletion and economic instability plus continued rapid urbanization with its negative consequences such as poverty slums and urban informality these planning systems have also to a large extent failed to meaningfully involve and accommodate the ways of life of communities and other stakeholders in the planning of urban areas thus contributing to the problems of spatial marginalization and exclusion it is clear that urban planning needs to be

reconsidered and revitalized for a sustainable urban future planning sustainable cities reviews the major challenges currently facing cities and towns all over the world the emergence and spread of modern urban planning and the effectiveness of current approaches more importantly it identifies innovative urban planning approaches and practices that are more responsive to current and future challenges of urbanization the global report on human settlements is the most authoritative and up to date global assessment of human settlements conditions and trends it is an essential reference for researchers academics public authorities and civil society organizations all over the world preceding issues of the report have addressed such topics as cities in a globalizing world the challenge of slums financing urban shelter and enhancing urban safety and security

featuring projects that have won awards in recent years this is a comprehensive book of tools and information on urban design this guide provides urban designers architects and students with contemporary urban design paradigms and principles processes and design tools for various project types and scales

the shortcomings of traditional regional policies led to a major policy thus regions have become more active in the design and implementation of policies following a bottom up approach and involving the participation of the local community in strategic planning as opposed to the traditional top down method this book addresses regional development theories and policies with a special focus on forgotten places and raises emerging questions about recent theoretical advances as well as trends and challenges in the field it examines two main and related issues the crucial role of regional actors for development and the role of forgotten spaces it emphasizes the spatial territorial approaches from different theoretical perspectives underlining place based approaches and compares the experiences of both successful and failed cases attempting to identify lessons and policy recommendations as well as adding empirical evidence to this field the different cases presented which focus on forgotten spaces allow the reader to assess the role of different actors for regional development as well as some sectoral approaches while there is a clear focus on european countries with different geographical institutional and sociocultural characteristics the book also examines good and bad examples of regional development and policies related to forgotten places from different regions worldwide including developed and developing countries the book benefits from contributions from over 20 authors from different nationalities and a rich diversity of case studies approaches and methods of discussion the authors discuss practical examples and more complex theoretical approaches involving techniques of spatial analysis spatial econometrics social networks content analysis as well as regional planning techniques the book will appeal to an interdisciplinary audience and will provide academicians politicians and policy designers with original and detailed analyses

collecting together 14 essays treating the panoramic oeuvre of novelist poet filmmaker and essayist iain sinclair this book aims to reflect and develop the current strong interest in his work
