mathematical modelling and computer simulation of activated sludge systems second edition provides from the process engineering perspective a comprehensive and up to date overview regarding various aspects of the mechanistic white box modelling and simulation of advanced activated sludge systems performing biological nutrient removal in the new edition of the book a special focus is given to nitrogen removal and the latest developments in modelling the innovative nitrogen removal processes furthermore a new section on micropollutant removal has been added the focus of modelling has been shifting in the last years to models that can describe the performance of a whole plant plant wide modelling the expanded part of this new edition introduces models describing the most important processes interrelated with the mainstream activated sludge systems as well as models describing the energy balance operating costs and environmental impact the complex process evaluation including minimization of energy consumption and carbon footprint is in line with the present and future wastewater treatment goals by combining a general introduction and a textbook this book serves both intermediate and more experienced model users both researchers and practitioners as a comprehensive guide to modelling and simulation studies the book can be used as a supplemental material at graduate and post graduate levels of wastewater engineering modelling courses

car manufacturers are playing a major role beneath the most promising industries for investors but the changing environment of political decisions and moving values of customers influence the strategies of the oems the quality strategy of the car brand plays an enormous role the increasing trend of major recall initiatives of vehicles is part of the daily press and harms the quality reputation of the car makers but how can the analyst give a statement about the quality performance with the public information provided by the oems one possibility is the evaluation of the provision for warranty which is part of the liabilities in the annual report this book compares the applicable requirements like laws and reporting standards which have to be followed it shows calculation methods to make the impact of laws and reporting standards visible in respect to the estimation of the failure probability statistic methods are explained finally the annual reports of the biggest car manufacturers are compared with each other in regards to the available information about warranty provisions and key figures are analyzed

the principle of the conventional activated sludge cas for municipal wastewater treatment is

primarily based on biological oxidation by which organic matters are converted to biomass and carbon dioxide after more than 100 years successful application the cas process is receiving increasing critiques on its high energy consumption and excessive sludge generation currently almost all municipal wastewater treatment plants with the cas as a core process are being operated in an energy negative fashion to tackle such challenging situations there is a need to re examine the present wastewater treatment philosophy by developing and adopting novel process configurations and emerging technologies the solutions going forward should rely on the ways to improve direct energy recovery from wastewater while minimizing in plant energy consumption this book begins with a critical overview of the energy situation and challenges in current municipal wastewater treatment plants showing the necessity of the paradigm shift from removal to recovery in terms of energy and resource as such the concept of a b process is discussed in detail in the book it appears that various a b process configurations are able to provide possible engineering solutions in which a stage is primarily designed for cod capture with the aim for direct anaerobic treatment without producing excessive biosludge while b stage is designated for nitrogen removal making the wastewater treatment energy self sustainable is obviously of global significance and eventually may become a game changer for the global market of the municipal wastewater reclamation technology the principal audiences include practitioners professionals university researchers undergraduate and postgraduate students who are interested and specialized in municipal wastewater treatment and process design environmental engineering and environmental biotechnology
