one exciting area of study is paul s use of the old testament the apostle routinely appeals to scripture to support his arguments and to persuade his readers one gets the impression that paul has a high respect for scripture and that his knowledge of it is broad and

comprehensive and yet there is something enigmatic about his use of the old testament at the same time something elusive and even puzzling his interpretations can appear strained sometimes going beyond the text's original context is paul a poor reader of scripture is there genuine tension between paul's interpretations and the original context of his quotations in this riveting study matthew l halsted takes readers through romans to explore these and related questions in the end he argues that such tension does exist and that the solution is not to ignore it or view it as a liability but rather to preserve it by adopting a hermeneutic that can sufficiently account for it as an integral element for each and every act of interpretation following the insights of philosopher hans georg gadamer 1900 2002 halsted describes paul's use of scripture as dialogical re-authoring a term that captures the dynamic relationship between the apostle and the jewish texts that were so important to him

based on extensive archival research in six countries and intensive fieldwork the book analyzes the history of the village of nkholongue on the eastern mozambican shores of lake malawi from the time of its formation in the 19th century to the present day the study uses nkholongue as a microhistorical lens to examine such diverse topics as the slave trade the spread of islam colonization subsistence production counter insurgency decolonization civil war ecotourism and matriliney thereby the book attempts to reflect as much as possible on the generalizability and global comparability of local findings by framing analyses in historiographical discussions that aim to go beyond the regional or national level although the chapters of the book deal with very different topics they are united by a common interest in the social history of rural africa in the *longue durée* contrary to persistent clichés of rural inertia in africa the book as a whole underscores the profound changeability of social conditions and relations in nkholongue over the years and highlights how people's room for maneuver kept changing as a result of the winds of history the frequent and often violent ruptures brought to the village from outside

gis and the social sciences offers a uniquely social science approach on the theory and application of gis with a range of modern examples it explores how human geography can engage with a variety of important policy issues through linking together gis and spatial analysis and demonstrates the importance of applied gis and spatial analysis for solving real world problems in both the public and private sector the book introduces basic theoretical material from a social science perspective and discusses how data are handled in gis what the standard commands within gis packages are and what they can offer in terms of spatial analysis it covers the range of applications for which gis has been primarily used in the social sciences offering a global perspective of examples at a range of spatial scales the book explores the use of gis in crime health education retail location urban planning transport geodemographics emergency planning and poverty income inequalities it is supplemented with practical activities and datasets that are linked to the content of each chapter and provided on an

this book approaches the structure of english from a form function perspective that is both theoretical and practical it asks learners to consider meaning structure and use in contrast to many grammars that focus on structure sometimes to the exclusion of use and even meaning the book presents an extended introduction to areas of grammar that many would see as indispensable such as participial and infinitive phrases the analysis is largely achieved through form function tree diagramming and extends the structure to include finite and nonfinite predicates
