this book constitutes the refereed proceedings of the 8th international conference on the theory and application of diagrams diagrams 2014 held in melbourne vic australia in july august 2014 the 15 revised full papers and 9 short papers presented together with 6 posters were carefully reviewed and selected from 40 submissions the papers have been organized in the following topical sections diagram layout diagram notations diagramming tools diagrams in education empirical studies and logic and diagrams

the first guided wave components that employed signals in the form of light beams traveling along thin films were fabricated a little more than two decades ago the parallel development of semiconductor lasers and the subsequent availability of low loss optical fibers made possible the implementation of completely optical systems for communications signal processing and other applications that had used only electronic circuitry in the past referred to as integrated optics this technology has been reinforced by utilizing electronic components that act as controlling elements or perform other functions for which the optical counterparts are not as effective the broader area thus generated was aptly named optoelectronics and it currently represents a fascinating rapidly evolving and most promising technology specifically the amalgamation of electronic and optics components into an integrated optoelectronics format is expected to provide a wide range of systems having miniaturized high speed broad band and reliable components for telecommunications data processing optical computing and other applications in the near and far future this book is intended to cover primarily the optical portion of the optoelectronics area by focusing on the theory and applications of components that use guided optical waves hence all aspects of integrated optics are discussed but optoelectronic components having primarily electronic rather than optical functions have not been included each chapter has been written by experts who have actively participated in developing the specific areas addressed by them
