there are books on statistical theory and books on statistical methods this is neither it is a book on statistical ideas and statistical reasoning and on their relevance to public policy and to the human sciences from medicine to sociology we have included many elementary graphical and numerical techniques to give flesh to the ideas and muscle to the reasoning students learn to think about data by working with data we have not however allowed technique to dominate concepts our intention is to teach verbally rather than algebraically to invite discussion and even argument rather than mere computation though some computation remains essential the coverage is considerably broader than one might traditionally cover in a one term course as the table of contents reveals in the spirit of general education we have preferred breadth to detail despite its informal nature scc is a textbook it is organized for systematic study and has abundant exercises many of which ask students to offer a discussion or make a judgment even those admirable individuals who seek pleasure in uncompelled reading should look at the exercises as well as the text teachers should be aware that the book is more serious than its low mathematical level suggests the emphasis on ideas and reasoning asks more of the reader than many recipe laden methods texts for the first time scc will publish with saplingplus as it s full course digital solution we ll have a well developed library of both error specific feedback and generic feedback tutorial assessment aligned to the main learning goals of the chapter and largely taken directly from the end of chapter exercises in the book saplingplus will also host our robust suite of teaching and learning resources concept and controversy videos statistical applets learning curve data sets and many more teaching and learning focused tools

this practical textbook by david moore and william notz introduces a conceptual approach to statistics and shows students how use these ideas to think about the statistical claims they see every day from polls campaigns advertising public policy and many different fields of study the ultimate goal is to equip students with solid statistical reasoning skills that will help them understand impact of statistics on all aspects of their lives

the twenty eight essays in this handbook all by leading experts in the field provide the most extensive treatment of various epistemological problems supplemented by a historical account of this field the entries are self contained and substantial contributions to topics such as the sources of knowledge and belief knowledge acquisition and truth and justification there are extensive essays on knowledge in specific fields the sciences mathematics the humanities and the social sciences religion and language special attention is paid to current discussions on evolutionary epistemology relativism the relation between epistemology and cognitive science sociology of knowledge epistemic logic knowledge and art and feminist epistemology this collection is a must have for anybody interested in human knowledge and its fortunes and misfortunes

examines the development of michael moore s ideas and the evolution of his filmmaking then dissects fahrenheit 9 11 and explores the many claims and disagreements about the movie s truthfulness this study shows that michael moore s film did more than shake up a nation

the current index to statistics cis is a bibliographic index of publications in statistics probability and related fields

this is a book of stories about teaching statistics these stories are told by fourteen different instructors of innovative statistics courses who demonstrate that learning statistics can be a positive meaningful and even exciting experience despite the prevailing opinion that statistics courses are dull and difficult for students these stories paint quite a different picture in the classes of the instructors whose stories fill this book students are engaged in learning are empowered to do statistics and appreciate the instructional methods of their teachers the instructors profiled in this book are inspiring dedicated teachers who have devoted considerable effort to creating courses and materials that enable students to successfully learn statistics each chapter begins by describing how the author became a teacher of statistics then provides details about the courses they currently teach describing their teaching method textbook types of student assessments and uses of technology one typical class is described in detail to provide a snapshot of what each person s teaching looks like the writers then tell the story of the process they went through in developing an innovative course and conclude their chapters with a discussion of their future plans for course revision or development as you read these stories you will learn about some great activities some helpful technological tools and some innovative assessment methods by reading these stories teachers of statistics will understand and be motivated to try different ways to implement reform recommendations so that these recommendations may continue to lead to a variety of new materials activities and teaching approaches i hope that teachers of statistics may be inspired by these stories and feel encouraged to try new methods leave behind more traditional approaches to teaching statistics and carefully examine the effect of their teaching on student learning publisher
