manufacturing contributes to over 60 of the gross national product of the highly industrialized nations of europe the advances in mechanization and automation in manufacturing of international competitors are seriously challenging the market position of the european countries in different areas thus it becomes necessary to increase significantly the productivity of european industry this has prompted many governments to support the development of new automation resources good engineers are also needed to develop the required automation tools and to apply these to manufacturing it is the purpose of this book to discuss new research results in manufacturing with engineers who face the challenge of building tomorrow's factories early automation efforts were centered around mechanical gear and cam technology and hardwired electrical control circuits because of the decreasing life cycle of most new products and the enormous model diversification factories cannot be automated efficiently any more by these conventional technologies with the digital computer its fast calculation speed and large memory capacity a new tool was created which can substantially improve the productivity of manufacturing processes the computer can directly control production and quality assurance functions and adapt itself quickly to changing customer orders and new products

in 2007 the great bach scholar anne leahy died at the age of 46 she was a leading light in bach studies and lecturer at the dublin institute of technology dit conservatory of music and drama posthumously edited by renowned bach scholar robin a leaver leahy's dissertation research forms the basis for this

original study of the preludes to bach's leipzig chorales originally composed in weimar and later revised in leipzig bach's compositions have been a source of some puzzlement as Leahy notes the original intentions of bach and the possible purpose of this collection might be regarded as speculative working from available sources however she argues that through the careful examination of the links among the music hymn texts and theological sources some answers may be had from bach's personal and deep interest in lutheran theology to his enormous musical passion Leahy considers closely a series of critical questions does the original manuscript for the chorales simply reflect a random gathering of compositions or is there a common theme in setting how critical is the order of the chorales and what is the theological significance of that order were the chorales a unified collection and if so which parts were to be included and which not indeed were the chorales themselves part of a possibly larger corpus as Leahy makes evident there are no simple answers which is why she considers critical the relationship the texts of the hymns to the chorales and to one another outlining a theological pattern that is vital to fully grasping the guiding philosophy of these compositions j s bach's leipzig chorale preludes music text theology is ideally suited for bach scholars and those with a general interest in the intricate connections between text and music in the composition of religious music
