africa and the global system of capital accumulation offers a groundbreaking analysis of the strategic role africa plays in the global capitalist

economy the exploitation of africa s rich resources as well as its labor make it possible for major world powers to sustain their authority over their own middle class populations while rewarding african collaborators in leadership positions for subjecting their populations into poverty and desperation middle class obsessions such as computers mobile phones cars and the petroleum that fuels them diamonds chocolate all of these products require african resources that are typically obtained by child or slave labor that helps to generate billionaires out of foreign investors while impoverishing most africans oritsejafor and cooper demonstrate that primitive accumulation believed by both adam smith and karl marx to be a process that precedes capitalism is actually an integral part of capitalism they also validate the thesis that capitalism incorporates racism as an organizing tool for the exploitation of labor in africa and on a global scale case studies are presented on nigeria cote d ivoire ghana liberia congo tanzania somalia angola namibia sao tome and principe and south sudan there are also chapters analyzing the interests of russia and china in africa this book will be of interest to students and scholars of african politics development and economics

this book analyzes how the iraqi city of fallujah became registered as a setting for military heroics in american memory in 2004 the u s military conducted two disastrous assaults in fallujah iraq more than 1 000 citizens were killed and according to the military s own estimate upwards of 200 000 people were displaced because of the violence yet despite this human catastrophe the kind of information that emerged in the public domain during the battle foregrounded the soldier s experience in war while effacing the destruction of iraqi bodies this tendency to foreground the soldier body is a direct result of the military s intervention in what they conceptualize as the information environment this book draws from the second assault in fallujah as a case study to explicate the military s investment in this perspectival space which is a consequence both of the mediatization of contemporary war and of the need to influence knowledge considered unfavorable to military operations in short the military enlists the media in their targeting process to produce information that is then deployed as persuasive force to modify the beliefs of specific target populations when the cultural texts produced by the media are remediated in the public domain after war they can be thought of as martial constructs because they originated during war through the military s systemized attempt to influence knowledge that is these texts trace to a specific battlefield objective this book reframes the notion of propaganda as a generalized public relations strategy into a more acute and coordinated attempt to decontextualize specific knowledge in the information environment this book will be of much interest to students of media and communication studies war studies memory studies and international relations

this book picks up where its predecessor somalia between jihad and restoration left off examining international efforts to stabilize war torn somalia it analyzes major political events in somalia in the years since 2006 examining opportunities for restoration of the country based on the united nations backed plan known as the roadmap for the end of the transition improved security conditions and international economics and financial support the author notes that the time of transition may be over according to the timetable of the united nations but it is clear that the work of transformation is just beginning in considering whether political and social chaos in somalia is ending shay sees two possible futures one possibility is the establishment of a reform government that unifies somali society another is continued strife that accelerates somalia s descent into the endless violence of a failed state shay believes the international approach to somalia requires a thorough

reassessment he argues it has been limited to two western priorities terrorism and piracy while largely ignoring domestic issues of critical concern to somalis as a result many somalis have come to view those participating in the international effort as a foreign occupation

the international humanitarian intervention in somalia was one of the most challenging operations ever conducted by us and un military forces until somalia the un had never run a chapter vii exercise with large numbers of troops operating under a fighting mandate it became a deadly test of the un s ability carry out a peace operation using force against an adversary determined to sabotage the intervention humanitarianism under fire is a candid detailed historical and political narrative of this remarkably complicated intervention that was one of the first cases of multilateral action in the post cold war era rutherford presents new information gleaned from interviews and intensive research in five countries his evidence shows how somalia became a turning point in the relationship between the un and us and how policy and strategy decisions in military operations continue to refer back to this singular event even today

the un peacekeeping system has largely outlived its usefulness and is bound to fail when applied to currently predominant violent and messy conflagrations lacking radical changes in that system the un should disarm restricting the peacekeeping to military observers missions and to subcontracting other operations out to military alliances and regional organizations the widely lamented massacres of innocent civilians under un peacekeeper eyes in rwanda srebrenica and the congo influenced neither the un s approach nor the analysis of the methods in this book andrzej sitkowski confronts two basic peacekeeping myths first the belief that peacekeeping is distinct from peace enforcement blurs this distinction and undermines the viability of peacekeeping operations in fact it is the un s definition of self defense which is understood to include actions of troops against forceful obstructions to discharging their mandates that confuses the issue nevertheless that distinction remains a cornerstone of the un doctrine secondly it is widely believed that the peacekeepers are allowed to apply force only in self defense and lack the authorization to use it in defending un security councils mandates this myth persists even in cases when the un security council undertakes explicit authorization to enforce specific goals of the mandate
