contemporary variations of meaning assigned to the north point to real processes which need to be studied in their own right to achieve this aim the book does not plainly specify the sites and levels of discourses be they academic political or popular but it does take into account the material circumstances making the context of the european north illustrated by a coherent set of specially written case studies the volume explores issues such as history literature gender folk culture pictorial representations environment and climate change and links these issues with the geo politics of the region

1964 dr bernard says this is the true home of the flying saucers the epoch making significance of adm byrd s flight for 1 700 miles into the north polar opening leading to the hollow interior of the earth the home of a super race who are the creators

one of the great virtues of american medieval goes north is its wide range of contributors with fascinatingly diverse relationships to the main terms of analysis there are academic scholars poets filmmakers tribal elders teachers at various levels there are indigenous people people from settler colonial cultures expats immigrants their analytic and imaginative encounters with the north catch at the intensely symbolic and political charge of that locus at a time when medieval studies cannot afford to ignore the period s popular uptake cannot continue with business as usual in the face of white supremacists brazen appropriations of the middle ages this volume points to new possibilities for grappling with the uneasy relationships between the american and the medieval prof carolyn dinshaw new york university
