now nearing its sixtieth printing in english and translated into nineteen languages michael e porter s competitive strategy has transformed the theory practice and teaching of business strategy throughout the world electrifying in its simplicity like all great breakthroughs porter s analysis of industries captures the complexity of industry competition in five underlying forces porter introduces one of the most powerful competitive tools yet developed his three generic strategies lowest cost differentiation and focus which bring structure to the task of strategic positioning he shows how competitive advantage can be defined in terms of relative cost and relative prices thus linking it directly to profitability and presents a whole new perspective on how profit is created and divided in the almost two decades since publication porter s framework for predicting competitor behavior has transformed the way in which companies look at their rivals and has given rise to the new discipline of competitor assessment more than a million managers in both large and small companies investment analysts consultants students and scholars throughout the world have internalized porter s ideas and applied them to assess industries understand competitors and choose competitive positions the ideas in the book address the underlying fundamentals of competition in a way that is independent of the specifics of the ways companies go about competing competitive strategy has filled a void in management thinking it provides an enduring foundation and grounding point on which all subsequent work can be built by bringing a disciplined structure to the question of how firms achieve superior profitability porter s rich

frameworks and deep insights comprise a sophisticated view of competition unsurpassed in the last quarter century

this book is about competitive advantage and how it is created at the company level our theoretical starting point is that the alignment of strategies and control systems affects the firm's chances of successfully positioning itself in its chosen area of competition the firm is in a better position to concentrate on activities that create value for the customer if its strategies and control systems are mutually consistent and adapted to expected external demands this book is thus a contribution to the literature that treats competitive advantage on the basis of the match between the environment and internal resources our ambition has been to provide additional knowledge in the area through a comprehensive discussion on co ordination and integration of strategies and control systems
