strategy has emerged as a watchword of modern change efforts calls to be strategic are sounded in the private sector government philanthropy and the not for profit sectors management experts stress the importance of strategic thinking change agents are urged to act strategically strategic planning has long been a mainstay of

organizational development leaders in all sectors talk not about theories of change or logic models but about being strategic strategic thinking strategic planning strategic results being strategic strategy execution effective strategies adapting strategically and now evaluating strategy but strategy is a new unit of analysis for evaluation traditionally evaluation has focused on projects programs products policies and personnel what does it mean to treat strategy as the evaluation focus as the thing evaluated what is strategy how does one evaluate strategy what are the implications of this new direction for evaluation theory methods practice and ultimately use this issue examines these questions and provides examples of strategy focused evaluations evaluating strategy is not about evaluating strategic planning or even strategic plans it's about evaluating strategy itself strategy is the evaluand that poses new challenges and offers new opportunities to meet the information needs of evaluation users for evaluation to be relevant to decision makers and leaders the focus of the evaluation must be on what they are concerned about and what they care about increasingly they care about identifying and implementing effective strategies that's where evaluation enters the picture evaluating strategy has the purpose of making strategy more effective differentiating effective from ineffective strategies and contributing to the ongoing development and adaptation of strategy in response to changing conditions and real world complexities evaluating strategy is a new direction for evaluation one that is likely to take on increasing importance if evaluators learn to do it well this issue takes up that challenge this is the 128th volume of the jossey bass quarterly report series new directions for evaluation an official publication of the american evaluation association

the sciences an integrated approach 9th edition by james trefil and robert hazen recognizes that science forms a seamless web of knowledge about the universe this text fully integrates physics chemistry astronomy earth sciences and biology and emphasizes general principles and their application to real world situations the goal of the text is to help students achieve scientific literacy applauded by students and instructors for its easy to read style and detail appropriate for non science majors the ninth edition has been updated to bring the most up to date coverage to the students in all areas of science with increased emphasis on climate change sustainability viruses and public health and an extensively updated chapter on the importance of bioengineering features include the science of life to help show the interdisciplinary nature of the many concepts introduced in the text sections on living things are included in most chapters the chapters that emphasize principles specifically related to life are at the end of the book but the biological examples appear throughout the ongoing process of science science is a never ending process of asking questions and seeking answers in these features some of the most exciting questions currently being addressed by scientists are examined mathematical equations and worked examples whenever an equation is introduced it is presented in three steps first as a sentence second as a word equation and finally in its

traditional symbolic form in this way students can focus on the meaning rather than the abstraction of the mathematics an appendix on english and si units is also included science by the numbers to help students understand the importance of simple mathematical calculations in areas of magnitude several nontraditional calculations have been incorporated for example how much solid waste is generated in the united states how long it would take to erode a mountain and how many people were required to build stonehenge great ideas and great ideas concept each chapter begins with a statement of a great unifying idea or theme in science and a concept map so that students immediately grasp the chief concept of the chapter and how the idea relates to the different branches of science these statements are intended to provide a framework for placing everyday experiences into a broad context stop and think questions challenge students to think critically about the implications of a scientific discovery or principle resources for instructors and students including practice quizzes flashcards lecture slides an instructor s manual images and tables from the book a test bank and much more

an innovative resource for literacy teachers teaching the struggling reader takes a novel approach to instruction the reading program is based on the needs of the struggling reader rather than the other way around most teachers plan their reading lesson and then work in the needs of a struggling reader this book is for teachers looking for a more contemporary and inclusive way to teach reading starting with assessment the author shows you how to group readers by ability and need rather than by risk factors finally you will save planning time by learning how to incorporate strategies that you already know into developing your lesson rather than changing your style to accommodate the requirements of a particular reading program
