taekwondo is unlike any other martial art and it deserves some special attention because of its importance as a sport with a unique history and influence this anthology as part of our projects to provide stellar articles from the journal of asian martial arts provides high quality materials about taekwondo you will not find elsewhere topics include fascets of taekwondo history practice competition health education character techniques and sport athletics you ll find the notes bibliographies illustrations and index are also valuable we have been very fortunate to include the writings of dr willy pieter a pioneer in the scientific study of taekwondo other articles in this book provide details of taekwondo history such as the detailed work by dakin burdick the earlier version as published in the journal caused quite a stir among korean martial

art aficionados particularly in the clear exposition that taekwondo's roots are found in Japanese and Okinawan traditions. Some chapters focus on specific techniques especially the pieces by Udo Moenig, Louis Bercades and Willy Pieter. The interview by José Suporta with Juan Moreno is very insightful as it includes a discussion of the differences of taekwondo practices for the martial artist and sport athlete. In her chapter Marzena Czarnecka uncovers the social relationships that often develop between students and teachers. The emotional and psychological bonds formed during classes are often difficult to notice and define but she does so with a unique research methodology. Van Reenam's chapter gives a refreshing portrait of childhood development through taekwondo practice. His conclusions will benefit those who teach as well as the youngsters and parents involved in taekwondo. Authoritative works dealing with taekwondo are published occasionally. This book is a milestone in taekwondo literature. Hopefully you will enjoy reading each page of this important anthology. Besides being a convenient collection of special readings on taekwondo we also hope the chapters will inspire future research and writing in this field.

The purpose of this study was to explore the mental skill used by top taekwondo athletes and to determine how well Orlick's wheel of human excellence (1995) could be applied to these athletes. In-depth interviews were conducted with nine Canadian taekwondo athletes who had completed and won medals at the international level. The results indicated that Orlick's elements of commitment, belief, full focus, positive images, mental readiness, distraction control and constructive evaluation were common to all subjects. The presentation of rich quotes and experiences offer valuable insights and strategies for taekwondo athletes. A survey of the mental skills of Canadian taekwondo athletes was also completed by 29 athletes to determine the importance of each of the mental skills identified in Orlick's model. All were ranked as important to success. Means ranged between 8.14 and 9.70 on a Likert scale of 10.
