assuming that women s empowerment would accelerate the pace of social change in rural nepal the world bank urged the nepali government to undertake a gender activities project within an ongoing long term water engineering scheme the author an anthropologist specializing in bureaucratic organizations and gender studies was hired to monitor the project analyzing her own experience as a practicing development expert she demonstrates that the professed goal of women s empowerment is a pretext for promoting economic organizational goals and the interests of local elites she shows how a project intended to benefit women through teaching them literary and agricultural skills fails to provide them with any of the promised resources going beyond the conventional analysis that positions aid givers vis à vis powerless victimized recipients she draws attention to the complexity of the process and the active role played by the nepalese rural women

who pursue their own interests and aspirations within this unequal world the book makes an important contribution to the growing critique of development projects and of women s development projects in particular

applications of management science is core for those academics researchers and practitioners of management science in mitigating significant managerial decision making problems for both the public and the private sectors

a structure is an assembly that serves an engineering function a smart structure is one that serves this function smartly i e by responding adaptively in a pre designed useful and efficient manner to changing environmental conditions adaptive behaviour of one or more materials constituting a smart structure requires nonlinear response this book describes the three main types of nonlinear response materials ferroic materials soft materials and nanostructured materials information processing by biological and artificial smart structures is also discussed a smart structure typically has sensors actuators and a control system progress in all these aspects of smart structures has leant heavily on mimicking nature and the all important notion in this context has been that of evolution artificial darwinian and lamarckian evolution holds the key to the development of truly smart structures modestly intelligent robots are already on the horizon projections about the low cost availability of adequate computing power and memory size indicate that the future really belongs to smart structures this book covers in a compact format the entire gamut of concepts relevant to smart structures it should be of interest to a wide range of students and professionals in science and engineering

upendranath brahmachari conjured a potent drug to vanquish the spectre of kala azar saving millions from the deadly disease ramnath chopra explored ancient ayurvedic knowledge extracting a natural compound from sarpagandha to treat seizures and high blood pressure azizul haque and hemchandra bose etched a novel cipher for fingerprints birthing the science of forensics with their elegant method though pilfered by scotland yard finding mention in the intricate plot of arthur conan doyle s the sign of four yelapragadda subbarow sculpted five monumental discoveries that reshaped modern medicine saving countless lives yet in a poignant twist of fate could not save his own these stories are not mere chronicles of invention but sagas of lives devoted to the pursuit of brilliance they bring alive the history and socio cultural milieu of the times these men lived in how they changed the landscape of indian science and how they proved that the only difference between the ordinary and the great is this that the ordinary think they are great and the great think they are ordinary
