seminar paper from the year 2012 in the subject philosophy miscellaneous grade 9 maastricht university language english abstract in the history of art ernst gombrich s groundbreaking art and illusion a study in the psychology of pictorial representation 1960 was influential in arguing against the traditional view of representation of reality in art as imitation in the philosophy of science notably karl popper and then thomas kuhn challenged the concept of progress as the cumulation of factual observations this paper wants to approach the larger issue of progress within the framework of art and illusion by asking in how far do concepts of progress as derived from the philosophy of science relate to the notion of arts more specifically how did gombrich challenge the traditional idea of representation as imitation in following it will be shown that gombrich s methodology and main concepts are greatly indebted to popper s theory of falsification in a second step thomas kuhn s theory of scientific revolution which opposes popper s writings will be outlined in relation to gombrich and his ideas of perception and classification

why science needs art explores the complex relationship between these seemingly polarised fields reflecting on a time when art and science were considered inseparable and symbiotic pursuits the book discusses how they have historically informed and influenced each other before considering how public perception of the relationship between these disciplines has fundamentally changed science and art have something very important in common they both seek to reduce something infinitely complex to something simpler using examples from diverse areas including microscopy brain injury classical art and data visualization the book delves into the history of the intersection of these two disciplines before considering current tensions between the fields the emerging field of neuroaesthetics and its attempts to scientifically understand what humans find beautiful is also explored suggesting ways in which the relationship between art and science may return to a more co operative state in the future why science needs art provides an essential insight into the relationship between art and science in an appealing

and relevant way featuring colorful examples throughout the book will be of interest to students and researchers of neuroaesthetics and visual perception as well as all those wanting to discover more about the complex and exciting intersection of art and science
