whether we're employees pitching colleagues on a new idea, entrepreneurs enticing funders to invest, or parents and teachers cajoling children to study, we spend our days trying to move others like it or not. We're all in sales now. *To Sell Is Human* offers a fresh look at the art and science of selling as he did in *Drive* and *A Whole New Mind*. Daniel H. Pink draws on a rich trove of social science for his counterintuitive insights. He reveals the new ABCs of moving others: it's no longer always be closing. Explains why extraverts don't make the best salespeople and shows how giving people an off-ramp for their actions can matter more than actually changing their minds. Along the way, Pink describes the six successors to the elevator pitch, the three rules for understanding another's perspective, the five frames that can make your message clearer and more persuasive, and much more. The result is a perceptive and practical book, one that will change how you see the world and transform what you do at work, at school, and at home.

The must-read summary of Daniel Pink's book *To Sell Is Human*: the surprising truth about persuading, convincing, and influencing others. This complete summary of the ideas from Daniel Pink's book *To Sell Is Human* explains how we sell to people every single day, whether we know it or not. By persuading others to do things, the author shows how you can improve your skills of persuasion, to get others to adapt to your way of thinking, using a set of tools and tips. This book includes different ways of offering your idea, listening to others, and making your message clear to help you perfect your approach. Added value of this summary: save time, understand the key concepts, increase your skills of persuasion, to learn more, read *To Sell Is Human* and discover the science behind selling to develop one of the most useful skills available.

The literature on rural America to the extent that it exists has largely been written by urban-based scholars perpetuating out-of-date notions and stereotypes or by those who see little difference between rural and agricultural concerns. As a result, the real rural America remains much misunderstood, neglected, or ignored by scholars and policymakers alike. In response, Emery Castle offers *The Changing American Countryside*, a volume that will forever change how we look at this important subject. Castle brings together the writings of eminent scholars from several disciplines and varying backgrounds to take a fresh and comprehensive look at the forgotten hinterlands. These authors examine the role of non-metropolitan people and places in the economic life of our nation and cover such diverse issues as poverty, industry, the environment, education, family, social problems, ethnicity, race, religion, gender, government, public policy, and regional diversity. The authors are especially effective in demonstrating why

rural america is so much more than just agriculture it is in fact highly diverse complex and interdependent with urban america and the international market place most major rural problems they contend simply cannot be effectively addressed in isolation from their urban and international connections to do so is misguided and even hazardous when one fourth of our population and ninety seven per cent of our land area is rural together these writings not only provide a new and more realistic view of rural life and public policy but also suggest how the field of rural studies can greatly enrich our understanding of national life
