the history of technology is often troubled by good ideas that do not for one reason or another take off right away sometimes for millennia sometimes technology comes to a standstill and sometimes it even reverses itself thus unlike science which seems to proceed at

a reasonable and calm rate the progress of technology is difficult to theorize about while in science many developments are predictable to a certain extent and this predictability may at times direct or stymie science's progress as with stem cell research and cloning technological advances such as the internet are often sudden and unpredictable and therefore frightening in theory of technology. David Clarke brings together nine authors who try to understand technology from a variety of viewpoints. Ria van Wyk in "Technology" parses the concept into many angles including its anatomy, taxonomy, and evolution. Karol Pelc in "Knowledge Mapping" discusses tracking the evolution of the emerging discipline of technology management. Jon Beard in "Management of Technology" pursues a similar mapping endeavor but looks to the patterns of the literature of technology management. Thomas Clarke in "Unique Features of an R&D Work Environment and Research" scientists and engineers takes the reader on a tour of how people of technology present unique challenges to not just management but whole organizations. Richard Howey in "Understanding Software Technology" places enterprise software into a meaningful pattern of technology management. Fred Foldvary and Daniel Klein in "The Half Life of Policy Rationales" discuss how new technology affects old policy issues. John Cogan in "Some Philosophical Thoughts on the Nature of Technology" maintains that our Aristotelian search for the essence of technology is doomed and Peter Bond in "The Biology of Technology" establishes a basis for the development of a socio-biological approach to understanding the phenomenon.

This book constitutes the refereed proceedings of the 6th IFIP TC 12 International Conference on Intelligence Science (ICIS 2024) held in Nanjing, China, in October 25–28, 2024. The 23 full papers and 2 short papers presented here were carefully reviewed and selected from 32 submissions. These papers have been categorized into the following sections: Machine Learning, Causal Reasoning, Large Language Model, Intelligent Robot, Perceptual Intelligence, AI for Science, Medical Artificial Intelligence.

Betty A. Reardon is a world renowned leader in the fields of peace education and human rights. Her pioneering work has laid the foundation for a new cross disciplinary integration of peace education and international human rights from a gender conscious global perspective. This collection of reflective inquiry and ongoing research gathers essential works on peace education and human rights (1967–2014) and provides access to Reardon's key works. These texts have been foundational to the field of peace education during the past five decades of her practical experience. The unique conceptualization of a holistic framework for organizing content and the practical and specific descriptions of pedagogies for the practice of critical peace education in schools and universities have made them essential resources for peace educators around the world. Several have already become standard texts for basic courses in the field. The book also includes an overview of Reardon's career and a bibliography of her publications.

Blinded by emotional rhetoric, political posturing, and genuine fear, previous efforts to defend our way of life against aggressors intent on inflicting personal and economic destruction have proven in hindsight to be misguided, panicked, and reactionary.
