this thesis presents a novel analysis of a photometric observational feature of type ia supernovae sne ia the most precise distance indicators available for cosmological studies while sne ia are crucial for understanding modern cosmology there are systematic uncertainties associated with them that prevent use to their full potential it is therefore vital that sources of systematic error in sn ia standardization are better understood in this thesis the author robustly connects the color magnitude diagram to sn ia spectra and their physics for the first time and shows that for the sn sample in the dissertation this feature is important to consider as a contributor to scatter in the hubble residual there is no prior work in the literature that examines this feature in such depth and it is rare to be able to paint such a thorough picture in a sn ia study rooted in a single photometric feature this work opens up many avenues for future observational and theoretical studies

ever since the discovery of the five platonic solids in ancient times the study of symmetry and regularity has been one of the most fascinating aspects of mathematics quite often the arithmetical regularity properties of an object imply its uniqueness and the existence of many symmetries this interplay between regularity and symmetry properties of graphs is the theme of this book starting from very elementary regularity properties the concept of a distance regular graph arises naturally as a common setting for regular graphs which are extremal in one sense or another several other important regular combinatorial structures are then shown to be equivalent to special families of distance regular graphs other subjects of more general interest such as regularity and extremal properties in graphs association schemes representations of graphs in euclidean space groups and geometries of lie type groups acting on graphs and codes are covered independently many new results and proofs and more than 750 references increase the encyclopaedic value of this book
