This book examines the ways in which the views of the public inhabit the counter terrorism policy space with a focus on the UK case drawing insights from critical terrorism studies critical security studies and studies of public opinion the book develops an argument that the relationship between public opinion is complex iterative and mutually instantiating rather than public opinion and counter terrorism policy existing in a simple uni directional causal relationship the book argues that whilst counter terrorism policy actors are informed by public opinion in important ways they also construct that very opinion this argument is made through an empirical analysis of UK counter terrorism policy drawing on primary research interviews with key counter terrorism policy actors and security professionals as well as original analysis of parliamentary debates the book demonstrates that rather than UK counter terrorism politics being closed and elite driven there exists a complex dialectical relationship between public opinion and both the making and the implementing of counter terrorism policy this book will be of much interest to students of critical terrorism studies counter terrorism security studies British politics and communication studies

most american citizens are quick to criticize federal bureaucracy for its size and inefficiency they assume it has exceeded the intent of our nation s founders yet men like james madison and alexander hamilton knew that good public administrators were essential to good government william richardson here examines the origins legitimacy and limitations of public administration from the perspective of the founders thought he shows that these men especially the authors of the federalist advocated an energetic public administration as an essential component of government and even considered the emergence of a natural aristocracy of virtuous civil servants the founders would see the fault of today s federal bureaucracy argues richardson not as much in its size as in the character of its members richardson relates the founders belief that the nation should strive to produce public servants committed to developing character traits such as wisdom and moderation that would exemplify the highest ideals of the republic and thus ensure its survival they anticipated some self interest on the part of administrators but believed it would be held in check by public opinion and the political process to test the success of the founders ideal richardson examines both the character of administrators and the role of ethics in forming that character he explores the various plans for educating public leaders throughout american history and looks at how attitudes toward public administration have changed in this century from woodrow wilson s scientific ideal to recent proposals to downsize government among other suggestions richardson advocates reforming existing institutions by emphasizing character democracy bureaucracy and character is an exercise in legitimizing public administration offering important insights into the founders thoughts that can be applied to today s debate over government bureaucracy public administration may be problematic by nature observes richardson but it is crucial to our form of government through his analysis we can see that while bureaucracy and democracy have long had an uneasy relationship neither can be effective unless we fully assess the place and purpose

of character in the american regime
