this book aims to help teachers and those who support them to re-imagine the work of teaching, learning and leading. In particular, it shows how transformations of educational practice depend on complementary transformations in classroom, school and system level organisational cultures, resourcing and politics. It argues that transforming education requires more than professional development to transform teachers; it also calls for fundamental changes in learning and leading practices which, in turn, means reshaping organisations that support teachers and teaching organisational cultures, the resources organisations provide and distribute and the relationships that connect people with one another in organisations. The book is based on findings from new research being conducted by the authors, the research team for the 2010-2012 Australian Research Council funded Discovery Project 'Leading and Learning: Developing Ecologies of
