the report focuses on formal and informal technical and vocational education and training tvet at the pre tertiary level in ghana tvet represents a major intersection between education youth and the labor market however market distortions and inefficiencies led to an adverse cycle of high costs inadequate quality of supply and low demand

we revisit the state of smallholder fertilizer demand and profitability in ethiopia in the face of the recent global fuel food fertilizer price crisis triggered by the russian ukraine war and compounded by other domestic supply shocks we first examine farmers response to changes in both fertilizer and food prices by estimating price

elasticity of demand we then revisit the profitability of fertilizer by computing average value cost ratios avcrs associated with fertilizer application before and after these crises we use three round detailed longitudinal household survey data covering both pre crisis 2016 and 2019 and post crisis 2023 production periods focusing on three main staple crops in ethiopia maize teff and wheat our analysis shows that fertilizer adoption use and yield levels were increasing until the recent crises but these trends seem halted by these crises we also find relatively large fertilizer price elasticity of demand estimates ranging between 0.4 and 1.1 which vary across crops and are substantially larger than previous estimates we find suggestive evidence that households with smaller farm sizes are relatively more responsive to changes in fertilizer prices we also document that farmers response to increases in staple crop prices is not as strong as perceived and hence appears to be statistically insignificant finally we show important dynamics in the profitability of chemical fertilizer while the avcrs show profitable trends for most crops the share of farmers with profitable avcrs declined following the fertilizer price surge our findings offer important insights for policy focusing on mitigating the adverse effects of fertilizer price shocks

this document reports the results of two coordinated studies of early education and care in the united states information on child care demand was provided through the national child care survey 1990 nccs which involved interviews with 4 392 parents information on child care supply was provided by a profile of child care settings pcs which involved interviews with 2 089 center directors and 583 day care providers the results of the nccs are presented in terms of types of supplemental care arrangements hours children spend in care and overall demand the results of the pcs are presented in a profile of care settings and descriptions of child care programs regional distribution and organizational sponsorship a study of the relationship between supply and demand considers the process of locating the proper form of care those seeking care will consider

the options and types of service available and the costs of care the key characteristics of care including program goals child staff ratios teacher training and parental satisfaction are highlighted trends in program enrollment fees and resources are identified references number 20 an appendix describes the nccs and pcs methodology and evaluates nccs and pcs estimates of day care center enrollments and the number of nonregulated family day care homes bc
