guerrilla teaching is a revolution not a flag waving drum beating revolution but an underground revolution a classroom revolution it's not about changing policy or

influencing government it's about doing what you know to be right regardless of what you're told it's sound advice for people on the ground people in real classrooms working with real children trying to make a real difference Jonathan Lear's new book Guerrilla Teaching is packed with ideas to refresh teaching practice combining direct teaching with creative child-led learning and forge cross-curricular links to create engaging, motivating and fun learning experiences. Ultimately Guerrilla Teaching is about making a difference. It's a book Jonathan Lear never meant to write but it was just too important not to. Guerrilla Teaching is to be a member of an unofficial group of combatants using the element of surprise to harass a larger, less mobile target. Guerrilla Teaching puts children and their learning at the heart of lessons to embrace problem solving and risk taking in the classroom to be adaptable and creative to think about the skills and knowledge children will need in the future to stand up and make sure children get the education they deserve even if it means subverting the system filled with thoughts, ideas and strategies that will help to develop creativity and creative thinking in the primary classroom. Guerrilla Teaching is for trainee teachers, new teachers, teaching assistants, experienced teachers and head teachers. There's something for everyone.

The complexity of what teachers do is incomprehensible to anyone who has not lived the experience. If one examines in detail the multi-dimensional, multi-layered, multi-faceted acts that a teacher performs each teaching day, it almost defies belief for it is beyond heroic. Done well, the impact is to influence students for all the days of their lives. Done well, it leaves students altered for the better. It takes a trained observer to perceive and comprehend the various acts, both overt and subtle, that a teacher carries out during the course of a school day. This is the onus of this book to make explicit the professional tasks of a teacher in today's fast-changing world where technology is rapidly replacing human interactions, where disinformation is daily fed to a gullible public, where funding and professional resources for schools are never enough, where students come to school carrying physical and emotional burdens that would daunt most adults, where the tasks of teachers are more demanding and more heart-breaking than ever before. How a teacher gives his or her all and yet manages to keep at the job without burning out is a significant feature of this book. Not only are these professional tasks identified and explained but suggestions are offered for how new and practicing teachers may further hone those skills that each task demands. Knowing the tasks is not enough; learning to apply them successfully is the key to becoming that master teacher.
