this market leading practical text helps student teachers develop their confidence understanding and skills to effectively and authentically teach arts with a strong balance between theory and practice delivering authentic arts education outlines the true nature of the key learning area of arts education and its importance in the curriculum emphasising the arts as forms of creative activity meaning making and expression in a cultural context initial chapters discuss how to recognise and build on existing artistic abilities and pedagogical skills how to encourage children s creativity how to lead arts appreciation experiences and the general principles of planning and assessment part 2 specifically examines the five arts areas dance drama media arts music and visual arts the final part of the text units of inquiry contains valuable sample learning activities and resources that demonstrate how to plan an effective lesson within a unit of inquiry

the music in this volume includes only a segment of recorded iroquois songs it presents the repertoire of a few leading singers from 2 of the 20 reservations in new york state and canada allegany with coldspring longhouse and tonawanda the scores are transcriptions from recordings by two collectors william n fenton and martha champion huot now mrs e p randle between 1933 and 1951 page xi

there is now strong evidence demonstrating that the brain simulates action and other functions such action simulation can be evoked through conscious mental rehearsal of movement or imagery but also through passive action observation watching movements in others furthermore there is evidence to suggest that mental rehearsal of movement or mental practice can produce improvements normally attributed to practising actual movements it is currently assumed that such improvements are due to neural activation associated with action simulation however the neuroscience of mental practice efficacy is still poorly understood the aim of this research topic is to clarify the underlying mechanisms of mental practice bringing evidence from cognitive neuroscience experimental

neuropsychology sport and movement science and clinical neurology it also attempts to address confusion regarding the concepts of imagery and observation which has hampered the progression of mental practice research both scientifically and applied as well as reviews theoretical and position articles this research topic includes original neuroimaging experimental and patient research addressing among others the following issues neuroimaging studies provide strong evidence for action simulation but the link to behavioural change and functional outcome is weak what is the evidence that mental practice efficacy is driven by neuroplasticity processes evoked by action simulation this research topic includes contributions on neural correlates and behaviour with regards to imagery and action observation much of the mental practice efficacy evidence comes from longstanding research within sport science however what does mental practice entail in these contexts and to what extent is it compatible with the cognitive neuroscience perspective of action simulation this research topic will include contributions that consider both evidence and concepts with regards to imagery and action observation in an attempt to build an interdisciplinary consensus on the nature and application of mental practice mental practice is perceived as a promising motor rehabilitation technique but critically there is lack of clarity or consensus on what mental practice treatment should entail it is also not clear what are the most appropriate outcomes to measure imagery ability and cognitive or behavioural change following mental practice a further important issue that needs consideration as part of this research topic is dosage as it is currently unclear how much mental practice is appropriate and whether this depends on patient variables such as age cognitive functioning motor function or pathophysiology
