a practical guide spreadsheets for chemists shows chemists of all levels how to use spreadsheet programs in their daily work it highlights the possibilities provided by lotus 1 2 3 the most widely used spreadsheet program in the sciences apart from hundreds of example fragments it features detailed discussion of the most relevant functions and all the macro commands an accompanying diskette containing 57 worksheets involving many different fields of chemical research and teaching an extensive glossary of spreadsheet terms three appendices covering 1 2 3 s competitors and add in packages the use of windows based spreadsheets and how what if analysis and back solving is applied although the disk examples were developed for lotus 1 2 3 dos versions 2 x x 2 4 the worksheets are compatible with the newer windows versions and those of their main competitors borland s quattro pro and microsoft s excel several compatible spreadsheets aseasyas proqube might also be as used as inexpensive alternatives the author is a senior scientist at the nuclear research centre in karlsruhe germany he has been using spreadsheet software for nearly ten years successfully in a variety of chemical problems

contains information for instructor led discussions and student activities on science topics

like the 1993 edition this iteration does not assume that students lab technicians and scientists have mastered the prerequisite calculation skills for quantitative problems in the chemical biomedical sciences a new chapter focuses on using spreadsheets and laboratory information management systems other chapters cover calculations and techniques relevant to reagents chemical reactions properties of gases and solutions ph and buffer preparation spectrophotometry enzyme assays and radioactivity also

included are derivations of some key equations quick reference guides and an index to the practical examples efiok is with the national heart lung and blood institute national institutes of health eduok is in the chemistry department at xavier u of louisiana c book news inc

activities for k 12 in 3 sections natural resources and pollution solid waste and hazardous waste includes background sheets and glossaries appendices index activities by age group topic and school subject

the question being asked with increasing regularity is just what do faculty members do studies of faculty workload have been commissioned in state after state taken together the studies indicate that college faculty members are working harder than ever but are probably teaching less and are almost certainly having less contact with students particularly undergraduates this volume of new directions for institutional research explores how the public discourse about faculty work might be improved and suggests how colleges and universities might document that work in a fashion that not only more faithfully describes what faculty do but also allows for reports that are more comprehensive and useful this is the 83rd issue of the quarterly journal new directions for institutional research for more information on the series please see the journals and periodicals page
