this book is an attempt to add the human view to a period of history a thousand years it is done by looking at fourteen lifetimes

in this volume we focus on the years following putin's return to the presidency in 2012 this has been a more active period than his first two terms including the annexation of crimea and ultimately the invasion of ukraine thus this period may be characterized as the run up to that war the core issue discussed in

this volume is putin s redefinition of democracy as the foundation of society and government in the russian federation putin argues for a strong central government in which unity is characterized as the absence of dissent in so doing putin seeks to recast russian national identity relying on a vision of russia as the victim of western aggression

science a four thousand year history rewrites science s past instead of focussing on difficult experiments and abstract theories patricia fara shows how science has always belonged to the practical world of war politics and business rather than glorifying scientists as idealized heroes she tells true stories about real people men and some women who needed to earn their living who made mistakes and who trampled down their rivals in their quest for success fara sweeps through the centuries from ancient babylon right up to the latest hi tech experiments in genetics and particle physics illuminating the financial interests imperial ambitions and publishing enterprises that have made science the powerful global phenomenon that it is today she also ranges internationally illustrating the importance of scientific projects based around the world from china to the islamic empire as well as the more familiar tale of science in europe from copernicus to charles darwin and beyond above all this four thousand year history challenges scientific supremacy arguing controversially that science is successful not because it is always right but because people have said that it is right

this is an open access book the aim of 2022 6th international seminar on education management and social sciences isemss 2022 is to bring together innovative academics and industrial experts in the field of education management and social sciences to a common forum the primary goal of the conference is to promote research and developmental activities in education management and social sciences and another goal is to promote scientific information interchange between researchers developers students and practitioners working all around the world the conference will be held every year to make it an ideal platform for people to share views and experiences in education management and social sciences and related areas

this book combines insights from the unification thought of reverend moon with those of modern medical science

since the time of aristotle there had been a clear divide between the three kingdoms of animal vegetable and mineral but by the eighteenth century biological experiments and the wide range of new creatures coming to europe from across the world challenged these neat divisions abraham trembley found that freshwater polyps grew into complete individuals when cut this shocking discovery raised deep questions was it a plant or an animal and this was not the only conundrum what of coral was it a rock or a living form did plants have sexes like animals the boundaries appeared to blur and what did all this say about the nature of life itself were animals and plants soul less mechanical forms as descartes suggested the debates raging across science played into some of the biggest and most controversial issues of enlightenment europe in this book susannah gibson explains how a study of pond slime could cause people to question the existence of the soul observation of eggs could make a man doubt that god had created the world how the discovery of the venus fly trap was linked to the french revolution and how interpretations of fossils could change our understanding of the earth s history using rigorous historical research and a lively and readable style this book vividly captures the big concerns of eighteenth century science and the debates concerning the divisions of life did not end there they continue to have resonances in modern biology
