importantly this stimulating text

this book constitutes the first treatment of c s peirce s unique concept of habit
habit animated the pragmatists of the 19th and early 20th centuries who picked up
the baton from classical scholars principally aristotle most prominent among the
pragmatists thereafter is charles sanders peirce in our vernacular habit connotes a

pattern of conduct nonetheless peirce's concept transcends application to mere regularity or to human conduct it extends into natural and social phenomena making cohesive inner and outer worlds chapters in this anthology define and amplify peircean habit as such they highlight the dialectic between doubt and belief doubt destabilizes habit leaving open the possibility for new beliefs in the form of habit change and without habit change the regularity would fall short of habit conforming to automatic mechanistic systems this treatment of habit showcases how through human agency innovative regularities of behavior and thought advance the process of making the unconscious conscious the latter materializes when affordances invariant habits of physical phenomena form the basis for modifications in action schemas and modes of reasoning further the book charts how indexical signs in language and action are pivotal in establishing attentional patterns and how these habits accommodate novel orientations within event templates it is intended for those interested in peirce's metaphysics or semiotic including both senior scholars and students of philosophy and religion psychology sociology and anthropology as well as mathematics and the natural sciences
